

## Chapter 18: Probability Models

### Probability Models

- Should consist of groups/categories & probability underneath (# in category/total)
- Probability model: (for a random phenomenon) describes all the possible outcomes and says how to assign probabilities to any collection of outcomes

### Rules of probabilities

- A probability is between 0 and 1
- Sum of all the probabilities of all possible outcomes = 1
- Probability that an event does not occur is 1 minus the probability that it does occur
- If two events have no outcomes in common, then the probability that one of the other occurs is the sum of their individual probabilities

### Probability and Odds

### Probability models for sampling

- Sampling distribution (of a statistic): tells us what values the statistic takes in repeated samples from the same population and how often it takes those values
  - Assigns probabilities to the values the statistic can take
  - Often described by a density curve such as a normal curve
    - Helps predict the outcome of many samples
    - Helps find a pattern
