China S 13th Five Year Plan:

China's 13th Five-Year Plan U S -China Economic and Security Review,U.S.-China Economic and Security Review Commission,2016-11-26 Xi Jinping s vision for China s development the 13th Five Year Plan is a blueprint that seeks to create a moderately prosperous society in all respects based on innovation open trade green growth and inclusive growth Understanding the key priorities of the world s top trading nation most populous country largest manufacturer and second largest economy and the opportunities and challenges they create for the United States is critically important for U S policymakers and businesses How will the Chinese government finance its ambitious reform agenda What is the impact of China s high tech industrial policies on U S automotive aerospace and semiconductor industries What are the opportunities and challenges for U S companies to compete fairly in China s expanding consumer and service market The 13th Five Year Plan builds upon the 11th and 12th Five Year Plans to shift China s economy away from large scale infrastructure and export led growth toward an economy driven by domestic consumption and higher value added manufacturing The Chinese government is hoping to unleash economic growth and create a new consumer base and working class through urbanization By 2020 the Chinese government hopes to increase the share of its population with urban hukou from 40 to 45 percent

Perfecting China, Inc. Scott Kennedy,Christopher K. Johnson,2016-06-08 This study examines China s 13th Five Year Plan the most authoritative strategic blueprint for the country s economic policies under Xi Jinping The plan seeks to rebalance the economy toward more advanced technologies greater environmental protection and a stronger social safety net However it does not fundamentally rebalance the relationship between state and market with the government and Chinese Communist Party still left with significant tools to micromanage most aspects of the economy Unless greater emphasis is given to shifting this balance the most likely result will be growth with volatility in which some Chinese companies move up the value added chain but without fundamentally improving the country s overall efficiency and performance

Regional Policy in China Marek Świstak,2022-12-12 Currently much is said about the directions of development of modern China However we still do not know what will determine the expected superpower position of the Middle Kingdom The book is an attempt to answer questions about China s main development challenges from a regional perspective China aspires to become the country with the largest economy and development potential This intention may turn out to be in vain if such significant disparities and development imbalances in the regional system are still present in China The key to understanding the transformation of contemporary China is to recognize the internal determinants of the functioning of both the state and the economy from a regional perspective A better understanding of the ways of managing regional development disparities may contribute to a more accurate assessment of the dynamics and directions of China s socio economic development

Belt and Road was among the most frequently used buzzwords in Chinese media a term strongly correlated to the topics mentioned The Belt and Road Initiative formerly One Belt One Road symbolizes how the lion intends to shake the world In his speech at the World Economic Forum in Davos in January 2017 the leader of the Communist Party of China CCP Mr Xi Jinping emphatically advocated a liberal economic globalisation environmental sustainability and abolition of protectionism According to him China will be a spearhead in defending economic globalization and promoting global economic development and opening up At the end of his speech the president referred to the Belt and Road Initiative BRI which was launched in 2013 and pursues the goals of fostering cooperation economic development and prosperity for all participating countries in a win win manner This initiative aims at nothing less than connecting Asia with Africa and Europe by establishing far spreading transport infrastructure networks via land and sea fostering trade boosting economic integration and increasing cultural exchange Since its launch it has attracted much attention especially concerning its political implications and obstacles Besides these political discussions figures of projects usually worth billions of dollars are circulating yet there are no papers examining the initiative based on economic theories and specifically focusing on the initiative s true capability to increase economic development in participating countries The common assessment is that huge transport and other infrastructure projects are beneficial for developing countries as they may boost trade and economic growth However this simplistic assumption should not be accepted without evidence as unproductive investments can have a huge negative impact on these economies thus this thesis will take a deeper look at the BRI s economic characteristics and compare them to economic development theories as well as theories about the correlation of economic growth and transport infrastructure investments In this way it intends to clarify the potential impact on participating countries economic development *Infrastructure Growth in India and China* Dhandapani Alagiri,2006 India and China are the two fastest rising economies in the world as the two nations are progressing on a hectic pace to claim their rightful places in the League of Nations The contrasting ways in which China and India are developing and the particula **Digest** ,1911 Western Christian Advocate ,1898 World News ,1926 *Daily Report* United States.
