

Build a UserForm for Excel

Introduction

A UserForm is a custom-built window that you build using the Visual Basic Editor. Using the techniques shown in Excel you can use the Visual Basic Editor to create a UserForm in any of the Microsoft Office programs that support VBA.

With a UserForm you can create a user-friendly interface for your spreadsheet or document, making data entry more comfortable for your end users. For the user:

About the Project

This document shows you how to build a simple UserForm for entering personal addresses data set up in a spreadsheet in Excel. The work is divided into two main sections: building the form itself and then writing the VBA code to make it work. The finished UserForm will look something like this (Fig. 2).

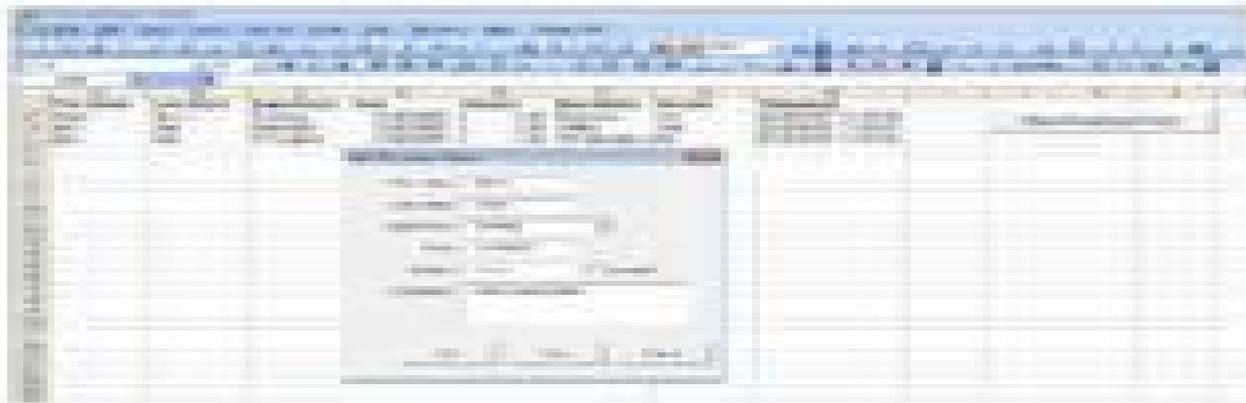

Fig. 2. The finished UserForm project

NOTE: The screenshots here show how things look in Excel 2003 running on Windows XP. If you are working on an different version of Excel, or Windows, the appearance and layout might differ, but all the techniques explained here will be exactly the same.

Build the Form

Open Excel and open the Visual Basic Editor (Visual Basic IDE) (VBE) (you will need to see how to do this in [Chapter 1](#) and the [Programming Windows](#) in it they are not visible upon their own right when using Excel).

NOTE: When building your UserForm try to avoid double-clicking on anything. Unlike the spreadsheet that you do use, double-clicking anywhere on the form's code window, or anywhere that accidentally clicks down the code window by clicking on Close buttons, or another place on the UserForm design window will stop your progress (instead of [Ctrl+Z](#) (Undo)).

Insert a New UserForm

Make sure that the correct workbook (e.g. [Microsoft Excel12](#)) is selected in the Project Explorer then open the **Project Explorer** and choose **UserForm**. When you do this a new, blank UserForm appears in the code window of the Visual Basic Editor and a corresponding entry appears in the Project Explorer (Fig. 2). The Project Explorer shows a new folder named **Forms** containing that new UserForm which has been given the name **UserForm1**.
