Structural Studies, Repairs and Maintenance of Heritage Architecture XII C. A. Brebbia, 2011 Architectural heritage is now recognised to be of great importance to the historical identity of a region town or nation In order to take care of that heritage we need to look beyond borders and share experiences and knowledge regarding heritage preservation This book contains papers covering the latest advances in this field presented at the twelfth and latest in a series of now biennial conferences that began in 1989 The series is recognised as the most important conference on the topic It covers such topics as Heritage architecture and historical aspects Regional architecture Preservation of archaeological sites Maritime heritage Heritage masonry buildings Adobe restorations Wooden structures Structural issues and restoration Seismic vulnerability and vibrations Assessment retrofitting and reuse of heritage buildings Surveying and monitoring Material characterisation and problems Simulation and modelling New techniques and materials Non destructive techniques Experimental validation and verification Performance and maintenance Environmental damage Social and economic aspects and Guidelines codes and regulations

Architectural Regeneration Aylin Orbasli, Marcel Vellinga, 2020-08-03 A comprehensive and detailed overview of the active regeneration rehabilitation and revitalisation of architectural heritage The combined processes of globalisation urbanisation environmental change population growth and rapid technological development have resulted in an increasingly complex dynamic and interrelated world in which concerns about the meaning of cultural heritage and identity continue to grow As the need for culturally and environmentally sustainable design grows the challenge for professionals involved in the management of inherited built environments is to respond to this ever changing context in a critical dynamic and creative way Our knowledge and understanding of the principles approaches and methods to sustainably adapt existing buildings and places is rapidly expanding Architectural Regeneration contributes to this knowledge base through a holistic approach that

links policy with practice and establishes a theoretical framework within which to understand architectural regeneration. It includes extensive case studies of the regeneration, rehabilitation and revitalisation of architectural heritage from around the world. Different scales and contexts of architectural regeneration are discussed, including urban, suburban, rural and temporary. At a time when regeneration policy has shifted to the recognition that heritage matters and that the historic environment and creative industries are a vital driver of regeneration, an increasing workload of architectural practices concerns the refurbishment, adaptive re-use or extension of existing buildings. As a result, this book is ideal for undergraduate and graduate students of architecture, historic conservation, urban and environmental design, sustainability and urban regeneration, as well as for practitioners and decision makers working in those fields.

Building Adaptation James Douglas, 2006-08-11. As existing buildings, which age nearly half of all construction activity in Britain, are related to maintenance, refurbishment and conversions, building adaptation is an activity that continues to make a significant contribution to the workload of the construction industry. Given its importance to sustainable construction, the proportion of adaptation works in relation to new build is likely to remain substantial for the foreseeable future, especially in the developed parts of the world. *Building Adaptation*, Second Edition, is intended as a primer on the physical changes that can affect older properties. It demonstrates the general principles, techniques and processes needed when existing buildings must undergo alteration, conversion, extension, improvement or refurbishment. The publication of the first edition of *Building Adaptation* reflected the upsurge in refurbishment work. The book quickly established itself as one of the core texts for building surveying students and others on undergraduate and postgraduate built environment courses. This new edition continues to provide a comprehensive introduction to all the key issues relating to the adaptation of buildings. It deals with any work to a building over and above maintenance to change its capacity, function or performance.

[Safeguarding the World Culture Heritage - Advances and New Perspectives](#) Sayed Hemeda, 2025-05-07. This book discusses contemporary issues related to safeguarding and rescuing the UNESCO World's Natural and Cultural Heritage in 3D documentation and conservation engineering projects. These critical components in cultural heritage often require detailed management techniques and unique solution methods to address failures and remedial measures. Thirteen chapters present advanced techniques and innovative materials in conservation engineering and heritage science. The Safeguarding the World Culture Heritage community continues to find improved testing techniques for determining the engineering properties of heritage materials, including non-destructive testing methods. Also, the design and implementation studies for the cure and preventive conservation of built heritage should be improved. To minimize failure during conservation projects, contemporary issues and data may reveal valuable lessons and information to improve conservation project management and minimize economic losses. This book discusses these aspects using appropriate methods in a simple way. This book discusses many interesting topics in conservation engineering and heritage science, like advances in the documentation and characterization of built heritage materials, modern geotechnical

and structural assessment methods and tools geotechnical earthquake engineering principles and practice in foundation design slope stability analysis and modeling in geomechanics offshore geotechnical engineering and geotechnical engineering for the preservation of historical buildings and archaeological sites
