

CHAOS REPORT 2015

The CHAOS Report 2015 is a model for future CHAOS Reports. There have only been two previous CHAOS reports, the original in 1994 and the 20th edition of 2014. This new type of CHAOS Report focuses on presenting the data in different forms with many charts. Most of the charts come from the new CHAOS database from the fiscal years 2012 to 2015. The CHAOS fiscal year starts March 1 and runs until the end of February. A few of the charts are from the new SURF database to highlight certain information. The purpose of this report is to present the data in the purest form without much analysis and little thought leadership. Analysis and thought leadership are offered in the CHAOS Manifesto series of reports.

Another major change is how we define success. We have multiple definitions, including our newest. We coded the new CHAOS database with six individual attributes of success: OnTime, OnBudget, OnTarget, OnGoal, Value, and Satisfaction. Our traditional definition is OnTime, OnBudget, and OnTarget. This means the project was resolved within a reasonable estimated time, stayed within budget, and contained a good number of the estimated features and functions. Our new Modern definition is OnTime, OnBudget, with a satisfactory result. This means the project was resolved within a reasonable estimated time, stayed within budget, and delivered customer and user satisfaction regardless of the original scope. We have the flexibility to present the results for one to six of these attributes in any combination.

ONBUDGET

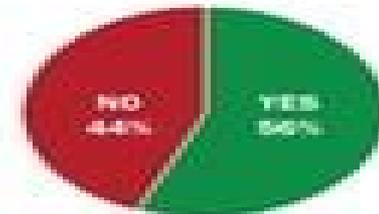

The percentage of projects that were OnBudget from FY2012 - 2015 within the new CHAOS database.

ONTIME

The percentage of projects that were OnTime from FY2012 - 2015 within the new CHAOS database.

ONTARGET

The percentage of projects that were OnTarget from FY2012 - 2015 within the new CHAOS database.

TRADITIONAL RESOLUTION FOR ALL PROJECTS

	2012	2013	2014	2015
SUCCESSFUL	30%	37%	41%	36%
CHALLENGED	30%	40%	40%	45%
FAILED	22%	17%	19%	19%

The traditional resolution of all software projects from FY2012 - 2015 within the new CHAOS database.

148 data points otherwise stated represents results from FY2012-2015. The total number of software projects is 25,000-plus, with an average of 5,000 per yearly period.

HCI International 2020 - Late Breaking Papers: Interaction, Knowledge and Social Media Constantine Stephanidis, Gavriel Salvendy, June Wei, Sakae Yamamoto, Hirohiko Mori, Gabriele Meiselwitz, Fiona Fui-Hoon Nah, Keng Siau, 2020-09-26 This book constitutes late breaking papers from the 22nd International Conference on Human Computer Interaction HCII 2020 which was held in July 2020. The conference was planned to take place in Copenhagen, Denmark but had to change to a virtual conference mode due to the COVID-19 pandemic. From a total of 6326 submissions, a total of 1439 papers and 238 posters have been accepted for publication in the HCII 2020 proceedings before the conference took place. In addition, a total of 333 papers and 144 posters are included in the volumes of the proceedings published after the conference as Late Breaking Work papers and posters. These contributions address the latest research and development efforts in the field and highlight the human aspects of design and use of computing systems. The 54 late breaking papers address topics such as Interaction, Knowledge and Social Media.

BI Without the BS Eva Polini, Karina Ghozali, 2026-02-16 Stop asking stakeholders what they want; start uncovering what they truly need. Many business intelligence (BI) projects fail not because of bad technology but because of poor requirements. Stakeholders often don't know what they need, and project teams assume too much. The result: costly delays, endless rework, and disappointing solutions. *BI Without the BS* offers a practical, proven framework to turn that around. Drawing from decades of experience in telecom, finance, retail, and global organizations, Eva Polini and Karina Ghozali guide readers through the real-world challenges of gathering BI requirements clearly, confidently, and effectively. Whether you're a business analyst, data visualization specialist, project manager, or BI leader, this book will help you understand the foundations of business analysis and requirement engineering, then how to apply them to BI. Go beyond surface-level requests to uncover core business needs. Deliver BI assets that are adopted, trusted, and aligned with strategic goals. Build stronger relationships with stakeholders while reducing friction and rework. Through relatable, actionable steps, the authors empower analysts to become proactive change agents who design solutions that genuinely support decision-making. Clear, accessible, and rich with insight, this book is your roadmap to building BI solutions that work the first time, on time, and on budget. If you're ready to go beyond gathering requirements and start driving results, this book is for you.

Improving Project Performance Jerry L. Wellman, 2011-11-29 The approach to project management is too often formulaic, describing what should be done and how to do it but not adequately describing why those actions are important. *Improving Project Performance* outlines the what and how of project management, emphasizing why actions matter, the overall intention of the formulaic steps, and the strengths or weaknesses of various tools and techniques. Successful project teams must understand and focus intently on what Wellman describes as the eight essential habits of successful project teams: Nurture a shared vision of what is to be accomplished; Translate that vision into a coherent set of performance specifications; Have an integrated plan for accomplishing the purpose; Measure their performance against the plan and their

progress toward the requirements Allow for uncertainty Manage change Continually act to influence their future Over communicate *Transdisciplinarity* Nima Rezaei,2022-11-13 This contributed volume book aims at discussing transdisciplinary approaches to address common problems By working transdisciplinarily researchers coming from different disciplines can work jointly using a shared conceptual framework bringing together disciplinary specific theories and concepts There are numerous barriers that can obstruct effective communication between different cultures communities religions and geographies This book shows that through bringing together different disciplines researchers not only can surpass these barriers but can effectively produce new venues of thought that can positively affect the development and evolution of research and education The book discusses new and emerging applications of knowledge produced by transdisciplinary efforts and covers the interplay of many disciplines including agriculture economics mathematics engineering industry information technology marketing nanoscience neuroscience space exploration human animal relationships among others Consequently it also covers the relationship between art and science as one of the most remarkable transdisciplinary approaches that paves the way for new methods in engineering design architecture and many other fields *Extensions to Linguistic Summaries Indicators based on Neutrosophic Theory, Applications in Project Management Decisions* Iliana Pérez Pupo,Pedro Y.
