The Three Types of memory

Can information Really be stored and easily retrived

- Three types of memory
 1. Sensory
 2. Short- term or working
 3. Long-term
- Sensory memory store information gathered from the five senses
- Usually temporary lasting a few seconds unless you decide the info is of importance to you and make an effort it transfers to long term
- Short term holds information for a short time
- Working memory bank can hold only a limited amount of facts or information at once
- It is useful to our brain survival that we don't keep in our memory everything we hear and see
- If you tried to remember everything you wouldn't be able to function

Pg 239

- You have to take steps to help you remember important info taking notes making associations, drawing pictures , and visualizing info help you move info from short-term to long-term
- Long term memory stores a lot of info
- You have to make effort to put something into your long-term memory
- Long-term consists of info that you have hear, use and see often and info that you have determined necessary or important to you
- Sometimes you have to wait for the info to come to you your brain will eventually find it
- You may have to assist your brain in locating the info using mnemonics and other memory

Pg239

Powerful Visualization techniques

How can VCR3 be used to increase memory power?

- Countless pieces of info are stored in long term memory some of it is triggered by necessity, five senses and experiences
- The best way to retrieve this info
 - Visualizing
