much to ask Without sweating let s settle for that Next we have a look at equipment but because manufactures can give you so much more information than we can and because we know you love shopping or looking at brochures we keep it to the minimum We tell you about tanks and tank maintenance burst disks balanced and unbalanced regulators venturi valves pilot valves up stream and down stream valves and types of depth gauges After this we are ready to understand what happens in your body when you go diving In the physiology of diving we will have a look at blood hearts lungs ears and all the things that can go wrong More importantly we will give you the knowledge you need to respond when things go wrong and even more importantly how to avoid things going wrong That does not mean you won t need an Emergency First Responder course You do because you need skills and practice But you will know all you need to know Finally we can bring it together and talk about decompression theory how tables and dive computers work You will know how compartments half times M values are used to make models for your tables or computers to keep you safe We did even more We made an on line course with videos and many more exercises to help you study This is also the place where people all over the world taking this course help each other with questions and answers Visit the on line course at [www.udemy.com/easydivetheory](http://www.udemy.com/easydivetheory) You can visit the Facebook page of the book and the course at <https://www.facebook.com/easydivetheory> fref t
