Triggers and Ranked Keyword Searches Over Virtual XML Views Feng Shao,2007 Current systems that publish XML relational data using XML views are passive in the sense that they can only respond to user initiated queries over the XML views Further existing systems do not support ranked keyword searches over virtual XML views which is important for exploring and retrieving information from large views In this dissertation we propose an XML view system whereby users can place active triggers on virtual unmaterialized XML views and can efficiently evaluate keyword search queries over such views In this architecture we present scalable and efficient techniques for processing triggers over nested views by leveraging existing support for SQL triggers over flat relations in commercial relational databases When evaluating the keyword search queries our approach exploits indices present on the base data and thereby avoids computing large parts of the view that are not relevant to the query results

Another feature of the algorithm is that it supports top k results for queries over the virtual view and the resulting rank order is the same as if the view was materialized We have implemented our proposed techniques in the context of the Quark XML middleware system Our performance results indicate that our proposed techniques are a feasible approach to supporting triggers and ranked keyword searches over virtual XML views Abstract [Database End-user](#) ,1987 [Database Searcher](#) ,1987 **ACT! 6 For Dummies** Karen S. Fredricks,2003-03-28 ACT organizes customer information in one place providing instant access to names phone numbers addresses appointments call histories follow up activities and more Explores ACT s features including a ready to use contact database with search capabilities Internet links mail fax and e mail merge synchronization with Palm OS handhelds integration with Outlook and other popular products report generation and a customizable database Latest edition of this successful title shows business professionals how to use ACT s new e mail features new active libraries and improved Internet services and Outlook integration
