Preparation Program
for
Oral Proficiency Interview by Computer (OPIc)
Level: Novice

- The goal of the OPIc is to gather a sample of your speech that is representative of your communicative skills in the target language.

- You will also have the ability to customize the test to your own level and interests by completing a self-assessment and background survey at the beginning of the test.

Background Survey: Selecting Topics of Conversation

The Background Survey asks you questions about your life in order to identify your interests, so you can then be asked some questions related to those interests during your OPIc Test.

Background Survey Sample Question:

What best describes your field of work?

and those which were not A qualitative analysis was also conducted by identifying via a grounded theory approach any notable patterns both within single interviews as well as between speakers Articulation rates differed significantly between the spontaneous and rehearsed segments however the strongest evidence of memorization lay in the transcriptions and the patterns that emerged within and across interviews   **The Language Educator** ,2007   □□ □□□□ ,2007

Self-Assessment Wenyue Ma,2018   *The Development and Validation of a Portuguese Elicited Imitation Test* Braden B. Reynolds,2020 Elicited imitation EI is a method of assessing oral proficiency in which the examinee listens to a prompt and attempts to repeat it back exactly as it was heard Research over recent decades has successfully established correlation between EI testing and other oral proficiency tests such as the Oral Proficiency Interview OPI and the OPI by computer OPIc This paper details the history of oral proficiency assessment as well as that of EI It then outlines the development process and validation of a Portuguese Elicited Imitation test The processes of item selection and item validation are detailed followed by the criterion related validation through a statistical correlation analysis of participants results on an official American Council on the Teaching of Foreign Languages ACTFL OPIc and their predicted OPIc scores which were based on their results of the Portuguese EI calibration test Results of the statistical analysis revealed a strong correlation between the predicted scores of the EI test and the actual OPIc scores In order to go beyond previously completed EI research this paper addresses the issue of face validity which has been a challenge for the proliferation of EI testing Analysis of a survey administered after participants completion of the two tests OPIc and EI addresses the experiences and reactions of the participants to the two testing formats Suggestions for future use of EI as well as future research will be presented

Simulated Oral Proficiency Interviews Charles W. Stansfield,1989 The Simulated Oral Proficiency Interview sopi is a semi direct speaking test that models the format of the Oral Proficiency Interview opi an oral proficiency test used by government agencies to assess general speaking proficiency in a second language The sopi is a tape recorded test consisting of six parts It begins with simple personal background questions posed on a tape in a simulated initial encounter with a native speaker of the target language Part one of the sopi is analogous to the warm up phase of the opi and the other five parts are designed to elicit language that is similar to language that would be elicited during the check and probe phases of the opi An examination of the sopi research shows that the sopi correlates so highly with the opi that it is safe to say that the tests measure the same abilities A comparison of the advantages of each test suggests that the sopi offers certain practical and psychometric advantages over the opi Vwl   **The ACTFL Oral Proficiency Interview** Kathryn Buck,Irene Thompson,Heidi Byrnes,1989
