Martínez Trinidad, Jesús A. Carrasco Ochoa, 2004-10-15 First of all we want to congratulate two new research communities from Mico

and Brazil that have recently joined the Iberoamerican community and the International Association for Pattern Recognition. We believe that the series of congresses that started as the Taller Iberoamericano de Reconocimiento de Patrones TIARP and later became the Iberoamerican Congress on Pattern Recognition CIARP has contributed to these group consolidations. We hope that in the near future all the Iberoamerican countries will have their own groups and associations to promote our areas of interest and that these congresses will serve as the forum for scientific research exchange, sharing of expertise and new knowledge, and establishing contacts that improve cooperation between research groups in pattern recognition and related areas.

CIARP 2004 9th Iberoamerican Congress on Pattern Recognition was the ninth in a series of pioneering congresses on pattern recognition in the Iberoamerican community. As in the previous year, CIARP 2004 also included worldwide participation. It took place in Puebla, Mexico. The aim of the congress was to promote and disseminate ongoing research and mathematical methods for pattern recognition, image analysis, and applications in such diverse areas as computer vision, robotics, industry, health, entertainment, space exploration, telecommunications, data mining, document analysis, and natural language processing and recognition, to name a few.

Soft Computing Approach to Pattern Recognition and Image Processing Ashish Ghosh, Sankar K. Pal, 2002. This volume provides a collection of sixteen articles containing review and new material. In a unified way, they describe the recent development of theories and methodologies in pattern recognition, image processing, and vision using fuzzy logic, artificial neural networks, genetic algorithms, rough sets, and wavelets with significant real-life applications. The book details the theory of granular computing and the role of a rough neuro approach as a way of computing with words and designing intelligent recognition systems. It also demonstrates applications of the soft computing paradigm to case-based reasoning, data mining, and bioinformatics with a scope for future research. The contributors from around the world present a balanced mixture of current theory, algorithms,

and applications making the book an extremely useful resource for students and researchers alike
