Q 19) Explain Control Unit in detail.

Ans Control unit controls the flow of data and instructions from input device to the memory and after work is done, it sends the task done back to the memory. Finally it sends the output from the memory to the output device.

Thus the Control Unit (CU) guides flow and interpretation of data and instructions. The CU controls all data and instructions till the required operation is performed/ executed. It takes the required instructions from the memory and executes them one after the other. It decodes the instructions from the memory then executes them. After completing the work, the control signals are sent to memory to fetch the next sequence in the memory.
