Keyword Research Guide Jennifer Ledbetter, 2009 **Keyword Research Guide**, *The Information Specialist's Guide to Searching and Researching on the Internet and the World Wide Web* Ernest C. Ackermann, Karen Hartman, 1999 This work is aimed at librarians who wish to use the Internet for research prospects and employs an interactive approach that blends concepts with learning activities. It covers basic browser usage, e-mail and discussion groups, and FTP and Usenet groups.

The Internet Research Guide Timothy K. Maloy, 1999 This guide to the Internet has been revised to reflect the latest developments in Web technology and to bring readers up to date on techniques for hunting down information in cyberspace. Rather than focusing on connection and navigation, the book explains how to research specific subjects. Providing information on using browsers, Newsgroups, and Listservs, it covers researching for general corporate, small business, finance, law, journalism, academic literature, and the social and hard sciences. Individual chapters for national, big city, and regional reporters are included, as well as detailed sections on specialized research, libraries, newspaper archives, and e-mail.

Literary Research Guide James L. Harner, 2008 James L. Harner's *Literary Research Guide*, which Choice calls the standard guide in the field, evaluates important reference materials in English studies. Since the publication of the first edition in 1989, tens of thousands of students and educators have used the Guide as an aid to scholarly research. In the new edition, Harner has added entries describing resources published since May 2001 and has revised nearly half the entries from the fourth edition. The fifth edition contains more than 1,000 entries, which discuss an additional 1,555 books, articles, and electronic resources, and cite 723 reviews. Readers of earlier editions will notice the inclusion of substantially more electronic resources, particularly reliable sites sponsored by academic institutions and learned societies, to account for the proliferation of bibliographic databases, text archives, and other online resources. This edition also features a new section on cultural studies.

The Lawyer's Guide to Internet Research Kathy Biehl, Tara Calishain, 2000 The law library of the future is already here. This down-to-earth practical guide, written from the perspective of a working attorney, takes the problem-solving steps that lawyers already use and shows how and where to do them on the Internet. It zeroes in on the best sites, sources, and techniques for finding cases, statutes, regulations, legislative history, government forms, public records, other attorneys, experts, and more.
