Investment Banking Paperback:

Investment Banking Joshua Pearl, Joshua Rosenbaum, 2013-05-29 *Investment Banking UNIVERSITY EDITION* is a highly accessible and authoritative book written by investment bankers that explains how to perform the valuation work at the core of the financial world. This body of work builds on Rosenbaum and Pearl's combined 30 years of experience on a multitude of transactions as well as input received from numerous investment bankers, investment professionals at private equity firms and hedge funds, attorneys, corporate executives, peer authors, and university professors. This book fills a noticeable gap in contemporary finance literature which tends to focus on theory rather than practical application. It focuses on the primary valuation methodologies currently used on Wall Street: comparable companies, precedent transactions, DCF, and LBO analysis, as well as M/A analysis. The ability to perform these methodologies is especially critical for those students aspiring to gain full-time positions at investment banks, private equity firms, or hedge funds. This is the book Rosenbaum and Pearl wish had existed when we were trying to break into Wall Street. Written to reflect today's dynamic market conditions, *Investment Banking UNIVERSITY EDITION* skillfully introduces students to the primary valuation methodologies currently used on Wall Street. It uses a step-by-step approach for each methodology and builds a chronological knowledge base. It defines key terms, financial concepts, and processes throughout. It provides a comprehensive overview of the fundamentals of LBOs and an organized M/A sale process. It presents new coverage of M/A buy-side analytical tools which includes both qualitative aspects such as buyer motivations and strategies along with technical financial and valuation assessment tools. It includes a comprehensive merger consequences analysis including accretion, dilution, and balance sheet effects. It contains challenging end-of-chapter questions to reinforce concepts covered. A perfect guide for those seeking to learn the fundamentals of valuation, M/A, and corporate finance used in investment banking and professional investing, this *UNIVERSITY EDITION* which includes an instructor's companion site is an essential asset. It provides students with an invaluable education as well as a much-needed edge for gaining entry to the ultra-competitive world of professional finance.

Investment Banking Giuliano Iannotta, 2010-01-12 From a historical point of view the main activity of investment banks is what today we call security underwriting Investment banks buy securities such as bonds and stocks from an issuer and then sell them to the retail investors In the eighteenth century the main securities were bonds issued by governments The way these bonds were priced and placed is extraordinarily similar to the system that investment banks still use nowadays When a government wanted to issue new bonds it negotiated with a few prominent middlemen today we would call them investment bankers The middlemen agreed to take a fraction of the bonds they accepted to do so only after having canvassed a list of people they could rely upon The people on the list were the retail investors The middlemen negotiated with the government even after the issuance Indeed in those days governments often changed unilaterally the bond conditions and being on the list of an important middleman could make the difference On the other hand middlemen with larger lists were considered to be in a better bargaining position This game was repeated over time and hence reputation mattered For the middlemen being trusted by both the investors on the list and by the issuing governments was crucial
