Handbook of Developmental Psychopathology Arnold J. Sameroff, Michael Lewis, Suzanne M. Miller, 2000-08-31

Developmental psychopathology involves the study and prediction of maladaptive behaviors and processes across time. This new edition of the Handbook furthers the goal of integrating developmental processes into the search for adequate categorical systems for understanding child mental health problems and the trajectories that lead to adult psychopathology. The editors respond to contemporary challenges to place individual behavior in a biological and social context. By including a range of approaches, this volume encompasses the complexity of the growing developmental literature. At the same time, it includes the most recent efforts to produce concise child diagnostic categories. In a thoroughgoing revision of the first edition of this classic text and reference published by Plenum in 1990, the editors have assembled a distinguished roster of contributors to address such topics as issues and theories, context and mental health, biology and mental illness, disorders of early childhood, disruptive behavior disorders, emotional disorders, control disorders, pervasive developmental disorders, and trauma disorders. Clinicians, researchers, and students in such diverse fields as developmental and clinical psychology, child and adolescent psychiatry, social work, and educational and counseling psychology will benefit from the concepts, investigations, and challenges presented in this state-of-the-art compendium.

Practitioner's Guide to Empirically Based Measures of Social Skills Douglas W. Nangle, David J. Hansen, Cynthia A. Erdley, Peter J. Norton, 2009-12-16. Social skills are at the core of mental health, so much so that deficits in this area are a criterion of clinical disorders across both the developmental spectrum and the DSM. The Practitioner's Guide to Empirically Based Measures of Social Skills gives clinicians and researchers an authoritative resource reflecting the ever-growing interest in social skills assessment and its clinical applications. This one-of-a-kind reference approaches social skills from a social learning perspective, combining conceptual background with practical considerations and organized for easy access to material relevant to assessment of children, adolescents, and adults. The contributors' expert guidance covers developmental and diversity issues and includes suggestions for the full range of assessment methods so readers can be confident of reliable, valid testing leading to appropriate interventions. Key features of the Guide: An official publication of the Association for Behavioral and Cognitive Therapies. Describes empirically based assessment across the lifespan. Provides in-depth reviews of nearly 100 measures, their administration and scoring, psychometric properties, and references. Highlights specific clinical problems including substance abuse, aggression, schizophrenia, intellectual disabilities, autism spectrum disorders, and social anxiety. Includes at a glance summaries of all reviewed measures. Offers full reproduction of more than a dozen measures for children, adolescents, and adults, e.g., the Interpersonal Competence Questionnaire and the Teenage Inventory of Social Skills. As social skills assessment and training become more crucial to current practice and research, the Practitioner's Guide to Empirically Based Measures of Social Skills is a steady resource that clinicians, researchers, and graduate students will want close at hand. **Harvard**

Family-Peer Relationships Ross D. Parke,Gary W. Ladd,2016-03-10 Originally published in 1992 this volume provided an up to date overview of recent research concerning the links between family and peer systems Considerable work in the past had focused on family issues or peer relationships but these systems had typically been considered separately This volume bridges the gap across these two important socialization contexts and provides insights into the processes that account for the links across the systems the ways in which the relationships between these systems shift across development In addition the variations in the links between family and peers are illustrated by cross cultural work studies of abused children and research on the impact of maternal depression In short the volume provides not only a convenient overview of recent progress at the time but lays out an agenda for future research
