Abu Dhabi International Building Code ICC, ABU Dhabi, Michael Grose, 2016-03-16 Construction Law in the United Arab Emirates and the Gulf is an authoritative guide to construction law in the United Arab Emirates and the Gulf. The principal theme is the contrast between construction law in an Islamic civil law jurisdiction and construction law in a common law jurisdiction. The first authoritative text on the application of the laws of the UAE, extensive extracts from the region's applicable laws, all translated from Arabic, and hundreds of judgments of the most senior courts used to back up the analysis provided. *The Report: Abu Dhabi 2015* Oxford Business Group, 2016-05-09 Hydrocarbons revenues still form the bulk of Abu Dhabi's GDP and while falling prices are a concern, the emirate has been moving steadily towards its economic diversification targets in line with Abu Dhabi Economic Vision 2030. The past 10 years has seen the non oil sector expand strongly on the back of business friendly government policies as a result of which non oil sector growth now outpaces that of the oil sector. Outside of hydrocarbons, construction and manufacturing represent the biggest GDP contributors in the emirate with the construction sector poised to enter a period of renewed expansion and manufacturing identified as a key area for future growth, leveraging the emirate's natural resources, growing downstream capabilities and strategic location. Elsewhere, Abu Dhabi's financial sector continues to assert itself and the expected 2015 launch of Abu Dhabi Global Market, the UAE's second financial free zone, is expected to boost activity in the sector. Meanwhile, visitor numbers to Abu Dhabi continue to rise with around 3.5m arrivals in 2014, up 25% on the previous year. This growth is expected to continue as major infrastructure upgrades continue apace. These include the expansion of Abu Dhabi International Airport and the development of the 1200 km wide Etihad rail project.

Water Quality Sadık Dincer, Fatıma Masume Uslu, Esra Sündüz Yiğittekin, Hatice Aysun Mercimek Takci, Melis Sumengen Ozdenefe, 2024-01-24 Water quality is a major concern worldwide. With the increasing population and rapid industrialization, water quality is suffering. Water quality instruction in many colleges and universities tends to focus on the chemical, biological, and physical quality of water. Quality management of marine and freshwater ecosystems, treatment strategies for water bodies for urban and domestic use, waterborne infectious diseases, and indicator bacteria of pollution. This book presents a comprehensive overview of water quality along with a series of solutions and recommendations detailing global treatment strategies for water pollution. It is a useful resource for students at all levels as well as researchers and industry experts in the domains of fisheries, forestry, geology, nutrition, and agriculture.

Environmental Hazards in the Arabian Gulf Region Abd el-aziz Khairy Abd el-aal, Abdullah Al-Enezi, Qusaie E. Karam, 2024-12-03 This book discusses the environmental hazards in the Gulf countries GCC. The publication of this book is of great importance to all those interested and knowledgeable in the field. Climate change leads to the occurrence of major environmental hazards that must be reduced by estimating the extent of climate change and developing appropriate solutions to mitigate those effects. Climate changes are produced indirectly as a

result of human activities with uncalculated consequences The process of climate change is always accompanied by catastrophic environmental problems such as global warming high temperatures storms hurricanes floods desertification processes air pollution and the extinction of many types and forms of animals and plants The Gulf countries are located in the eastern part of the Arabian Peninsula where the crude oil is extracted in several fields The states suffer from many environmental problems as a result of its geographical location global climate change and also from oil extraction operations The problems include high temperatures induced earthquakes and pollution in the soil and marine coast as well as desertification processes sand dunes movement and other environmental problems Earthquakes are also recorded from and near the oil fields indicating the link between the oil extraction process and the occurrence of earthquakes Indeed the environmental studies published in the Gulf state are very few and do not meet the need of the scientific community in region which need more important environmental publications that help in the great and rapid urban developments in the area
