

### Overview

The diagram illustrates the transition from AngularJS to Angular 2. It shows a browser environment where AngularJS and Angular 2 coexist. AngularJS is used for existing applications, while Angular 2 is used for new applications. The diagram also shows the relationship between the browser, the AngularJS library, the Angular 2 library, and the application components.

### The Module

AngularJS uses a module-based architecture. The `ng` module is the core module, and other modules are loaded on top of it. This allows for a modular and scalable application structure.

### The Template

AngularJS uses a template-based architecture. The `ng` module is the core module, and other modules are loaded on top of it. This allows for a modular and scalable application structure.

### The Component
