Proceedings of the 13th International Conference on Ubiquitous Information Management and Communication (IMCOM) 2019 Sukhan Lee, Roslan Ismail, Hyunseung Choo, 2019-05-22 Over the past few years, technologies have experienced boundaries getting blurred and the concept of convergence to gain prominence. Harnessing from these two main tracks for information processing, management, and communication are held, covering both research and application works of information management, intelligent information processing, interaction management, networking, telecommunications, and social interaction. This book creates a unique opportunity for research convergence among truly diverse technology domains of computer science. Leveraging from this diversity of topics, researchers get to generate novel research ideas by seeking application of their research in a different technology domain. This volume represents the collection of papers presented at the 13th International Conference on Ubiquitous Information Management and Communication (IMCOM) 2019 held on 4-6 January 2019 in Phuket, Thailand. Out of 228 papers submitted from all around the world, 88 papers were accepted for presentations. The 88 contributions to this volume are organized into 5 chapters: Chapter 1: Network Evolution; Chapter 2: Intelligent and Secure Network; Chapter 3: Image and Video Processing; Chapter 4: Information Technology and Society; and Chapter 5: Data Mining and Learning. System Programming in Linux Stewart Weiss, 2025-10-14 Learn to write real Linux software, not just run it. Most programmers never learn how Linux really works. Why? Because system programming is rarely taught, and the tools can be intimidating without the right guidance. As a result, many developers stick to high-level languages and frameworks, writing code that runs on Linux without understanding how it interacts with Linux. In today's world, that's not enough to stand out. Especially as more companies turn to AI to write their software, the question becomes: How do you stay relevant in an AI-driven world? You learn how things really work. If you've ever wondered how processes are created, how memory and files are managed, or how programs communicate in a Unix environment, *System Programming in Linux* will make it all make sense.

This is a hands on guide to writing software that interfaces directly with the Linux operating system You ll go beyond shell commands and abstractions to understand what the kernel is doing and how to leverage it through your own code Rather than telling you how to solve each problem Professor Stewart N Weiss guides you through the process of discovering the solution yourself Start with the core concepts of Unix and Linux then work your way up to advanced topics like process control signals interprocess communication threading and non blocking I O Each chapter includes conceptual diagrams annotated source code and practical projects to help you immediately apply what you ve learned You ll explore topics such as The structure of Unix and Linux operating systems and why it matters Using system calls to create and manage processes The mechanics of signals timers and interprocess communication Using synchronization tools to write multithreaded programs Interacting with filesystems devices and terminals Building text based user interfaces using ncurses Developing programs that are robust efficient and portable At Hunter College Professor Weiss built the course this book is based on and he has helped thousands of students go from confusion to confidence in his over 40 years of teaching programming His clear conversational style technical depth and focus on real world application make this one of the most approachable and powerful system programming books available As Linux continues to dominate development server and embedded environments understanding the system behind your software isn t just helpful it s essential Whether you re a student developer or sysadmin this book gives you the tools to work directly with Linux and the insight to understand what s really happening under the hood
