2	Jane Doe	English, History	B

First Normal Form (1NF) is the most basic level of normalization. The rules for achieving 1NF are:

- 1 Each table should have a primary key, which uniquely identifies each record in the table.
- 2 Each column in the table should contain only atomic values, which means that a single cell should contain a single value and not a list of values.
- 3 There should be no repeating groups of data.
