1. How many times bigger is Brazil than Greenland? (5 marks)

Answer:

3.93 x or 4x larger

2. Describe what happens when you move the countries around the map (hint is the size, shape or area changing) (5 marks)

Answer:

The size of each country changes depending on the actual size of the country you lay it over. The shape can also be distorted based on the distance from the equator, this in conjunction with the size change can make the countries look larger however the overall land mass of the countries remains the same regardless of the map.

3. Which country is longer New Zealand or the United Kingdom? (5 marks)

Answer:

New Zealand

4. Which country is wider, Kenya or Iceland? (5 marks)

Answer:

Kenya

5. What do you think are the main problems with using Web Mercator maps? (10 marks)

Answer:

Precision: the edges of the countries are often slightly changed and not accurate to the exact outline/border of countries.

Distortion: Mercator maps can distort countries closer to the top and the bottom of the map/ further away from the equator. The size and shape of a country tends to change and become distorted based on its distance from the equator.
