**Business Process Management** Richard Hull, Jan Mendling, Stefan Tai, 2010-08-25 The BPM Conference series has established itself as the premier forum for

searchers in the area of business process management and process aware information systems. It has a record of attracting contributions of innovative research of the highest quality related to all aspects of business process management including theory, frameworks, methods, techniques, architectures, systems, and empirical findings. BPM 2010 was the 8th conference of the series. It took place September 14-16, 2010, on the campus of Stevens Institute of Technology in Hoboken, New Jersey, USA, with a great view of Manhattan, New York. This volume contains 21 contributed research papers that were selected from 151 submissions. The thorough reviewing process: each paper was reviewed by three to five Program Committee members, followed in most cases by in-depth discussions, was extremely competitive with an acceptance rate of 14%. In addition to the contributed papers, these proceedings contain three short papers about the invited keynote talks. In conjunction with the main conference, nine international workshops took place the day before the conference. These workshops fostered the exchange of fresh ideas and experiences between active BPM researchers and stimulated discussions on new and emerging issues in line with the conference topics. The proceedings with the papers of all workshops will be published in a separate volume of Springer's Lecture Notes in Business Information Processing series. Beyond that, the conference also included a doctoral consortium, an industry program, resident chats, tutorials, panels, and demonstrations.
