A full sample application allows you to apply many of the technologies and techniques covered in this book and see how they work together. **Benchmarking as a Foundation of the Future Economy** Berezin Artiom Andreevich, 2020-09-02 This book explores how to increase the efficiency of decision making for enterprise management and increase its competitiveness based on mathematical modeling of the benchmarking process, predictive modeling of the dynamics of economic performance indicators, and the synthesis and selection of development strategies using software tools. It argues that instead of mutually devouring competition, which is common in the modern world, the model of friendly cooperative benchmarking, on the principle of win-win, is proposed for consideration. The advantage of this principle over the classic competitiveness one is proved through mathematical modeling and implementation of this approach in the activities of real companies, banks, and industrial enterprises.
