Progressive Web Apps with React Scott Domes, 2017-10-23

Enhance the performance of your applications by using React and adding the Progressive web app capability to it

About This Book

Bring the best of mobile sites and native apps to your users with progressive web applications

Create fast reliable and engaging PWAs with React and Firebase

Create high performance applications even with low connection speeds by leveraging modern web technologies

Who This Book Is For

This book is for Javascript Developers who want to develop high performance Web User Interfaces

This book requires basic knowledge of HTML CSS and JavaScript

What You Will Learn

- Set up Webpack configuration as well as get the development server running
- Learn basic Firebase configuration and deployment
- Create routes manage multiple components and learn how to use React Router v4 to manage the flow of data
- Use React life cycle methods to load data
- Add a service worker to the app and learn how it works
- Use a service worker to send Push Notifications
- Configure Webpack to split up the JavaScript bundle and lazy load component files
- Learn how to use the web Cache API to use your app offline
- Audit PWAs with Google s Lighthouse tool

In Detail

For years the speed and power of web apps has lagged behind native applications

Progressive Web Apps PWAs aim to solve this by bridging the gap between the web apps and native apps delivering a host of exciting features

Simultaneously React is fast becoming the go to solution for building modern web UIs combining ease of development with performance and capability

Using React alongside PWA technology will make it easy for you to build a fast beautiful and functional web app

After an introduction and brief overview of the goals of PWAs the book moves on to setting up the application structure

From there it covers the Webpack build process and the process of creating React components

You ll learn how to set up the backend database and authentication solution to communicate with Firebase and how to work with React Router

Next you will create and configure your web app manifest making your PWA installable on mobile devices

Then you ll get introduced to service workers and see how they work as we configure the app to send push notifications using Firebase Cloud Messaging

We ll also explore the App Shell pattern a key concept in PWAs and look at its advantages regarding efficient performance

Finally you ll learn how to add offline capabilities to the app with caching and confirm your progress by auditing your PWA with Lighthouse

Also you ll discover helper libraries and shortcuts that will help you save time and understand the future of PWA
