INSIGHTS AT THE NEXUS
GENERATIVE ARTIFICIAL INTELLIGENCE - FROM BASICS TO BREAKTHROUGHS Neha Dhaliwal,2024-06-14 Have you ever imagined that simply by picturing something and typing an image or video could be generated How fascinating is that This concept once relegated to the realm of science fiction has become a tangible reality in our modern world The idea that our thoughts and words can be transformed into visual content is not only captivating but a testament to human innovation and creativity Figure 1 1 The machine generated image based on text input Even as data scientists many of us never anticipated that AI could reach a point where it could generate text for a specific use case The struggles we faced in writing code or the countless hours spent searching on Google for the right solution were once common challenges Yet the technological landscape has shifted dramatically and those laborious tasks have become relics of the past How has this become possible The answer lies in the groundbreaking advancements in deep learning and natural language processing NLP

Parental Alienation Theory: Official Synopsis Parental Alienation Study Group, Inc.,2025-08-11 Family law is fraught with

conflict and few issues spark more debate among mental health and legal professionals than parental alienation. When a child aligns strongly with one parent while rejecting the other, often due to indoctrination rather than legitimate reasons, the consequences can be devastating for families. Yet professionals remain deeply divided on how to define, diagnose, and address this issue, creating further polarization in both policy and practice. *Parental Alienation Theory: Official Synopsis* is a bold step toward consensus. This synopsis provides an antidote to this issue by offering a concise, comprehensive summary of current information about PA, grounded in the impressive accumulation of evidence from social science about this complex area of family law. It counters information on PA from sources that lack rigorous social science methodology and/or propagate advocacy positions without an evidence base. This concise text brings together a group of experts who have developed a shared framework on definitions, terminology, diagnosis, prevention, and intervention. Designed as a foundation for ongoing dialogue, this work invites contributions from researchers, practitioners, and policymakers to refine and expand upon its principles in future editions. By fostering collaboration and standardizing approaches, this book seeks to bridge professional divides and offer families a clearer path to resolution.

Artificial Media Nelson Zagalo, Damián Keller, 2025-07-29. A groundbreaking exploration of the evolving relationship between the fields of artificial intelligence and creativity studies. *Artificial Media* charts the course of a transformative path toward hybrid methodologies involving computing and human-centric approaches. Scholars and practitioners from leading research centers in South America, Asia, and Europe delve into theoretical and philosophical frameworks, practical deployments, and data-based critical analyses of artificial media initiatives that reconfigure authorship and collaboration. Co-creation, collective memory, and situated knowledge practices are featured in multiple hands-on examples of technological design, music, visual arts, journalistic, and educational projects that address the ethical and social implications of generative techniques. Through an interdisciplinary lens, this collection projects a nuanced panorama of both the remarkable results and the complex challenges of emerging artificial media methods, offering practical insights for anyone seeking to engage with the future of creativity in the age of autonomous machines.
