

EI-BASED THEORY PERFORMANCE

Daniel Goleman- set out a framework of emotional intelligence (EI) that reflects how an individual's potential for mastering the skills of Self-Awareness, Self-Management, Social Awareness, and Relationship Management translates into on-the-job success.

This model is based on EI competencies that have been identified in internal research at hundreds of corporations and organizations as distinguishing outstanding performers.

Emotional competence is "a learned capability based on emotional intelligence that results in outstanding performance at work" (Goleman, 1998b).

To be adept at an emotional competence like Customer Service or Conflict Management requires an underlying ability in EI fundamentals, specifically, Social Awareness and Relationship Management.
