An Investment Analysis Case Study Nyu Stern:

The Race to Zero Paul H. Tice, 2024-02-20 Paul Tice delivers a body blow to the predations of the ESG industrial complex Mark P Mills Senior Fellow Manhattan Institute Over the past few years sustainable investing which is based on the theory that subjective environmental social and governance or ESG factors should drive corporate policy and investment decisions has swept across Wall Street spurred on by the United Nations sovereign governments and financial regulators and cheered on by academics environmental activists social justice warriors and the media To date there has been little public resistance or analytical pushback as the ESG orthodoxy has integrated itself into almost every corner of the financial markets By 2030 the iron curtain of sustainability will have fully descended across Wall Street Race to Zero is meant to provide a detailed rebuttal to the case for sustainable investing from the perspective of a long time Wall Street analyst and investor and latter day finance professor Sustainable investing is a scam because it is not about generating excess returns for investors or furthering ethical goals such as improving society or saving the planet rather it is about controlling the world's financial system and determining the allocation of capital and investment flows across the markets It is liberal progressive politics masquerading as finance whose objective is to create a compliant corporate sector that serves as both Greek chorus and funding source for the environmental and social causes championed by government and the elite class This book is designed to expose this truth in plain spoken language free of financial jargon to reach the widest possible audience including the silent majority on Wall Street now afraid to speak up about ESG

Industrialization in Ethiopia: Awakening - Crisis - Outlooks Reimer Gronemeyer, Michaela Fink, 2023-11-23 Ethiopia though remaining one of the least urbanised countries in the world has taken impressive actions to transform the state into a more industrialized nation Several industrial parks have been built in recent years throughout the whole country The textile sector is one of these sectors The textile industry is expected to provide employment for hundreds of thousands and thus improve people's living conditions and contribute to the development of the country Major reason for Asian investors to shift their focus to Ethiopia are extremely low wages and the lower production costs involved The Ethiopian textile industry has to deal with high rates of labor turnover and absenteeism From the perspective of the mostly international managers the reason for turnover and absenteeism is often attributed to the mindset of the predominantly female workforce A research project financed by the German Bundesministerium für wirtschaftliche Zusammenarbeit und Entwicklung is looking at reasons and possible measures to solve this problem Results of this project conducted at the University of Giessen by Michaela Fink and Reimer Gronemeyer together with Ethiopian colleagues are presented in this book Experts from Ethiopia and Germany are presenting the history of the textile industry in Ethiopia and the coming development All this is framed by the discussion of present crisis Covid 19 the war in Ethiopia

Sustainable Finance and the Global Health Crisis Pasquale Marcello Falcone, Edgardo Sica, 2023-08-01 The speed with which the various economies recover from the Covid 19 pandemic will significantly determine the economic pressure placed on the environment in the medium to long term Furthermore the pandemic has

highlighted the strong interrelations between natural and societal systems with societal resilience depending on a resilient environmental support system In this context the book argues that the pandemic represents a wake up call for financial systems to be better prepared for the climate crisis and social risk and has provided a stimulus to scale down the reliance of the global economy on fossil fuels The first part of the book provides a deep and creative discussion between leading international researchers and experts on the policy options and financial instruments which can help to catalyze the green finance transition in the post Covid 19 era The contributions show that sustainable finance is emerging as a powerful tool to advance the transition towards a more environmentally and socially sustainable economic model Instruments such as sovereign green bonds green securities and other sustainability related securities can play a significant role in the post Covid 19 world to fund economic stimulus and to lead the way to new and more sustainable future The second part of the book supports the debate by highlighting a number of selected case studies on financing transitions in different regional contexts including Africa Asia Europe and Latin America The book marks a significant contribution to the literature on environmental economics and finance climate change and sustainability transitions Chapter 12 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
