

Animal Experimentation

Title: Animal Experimentation

Author: [Sarah White](#)

Grade Level: 10–12

Summary of Lesson

Students will examine the benefits and drawbacks of animal experimentation and write a position paper on the topic.

Focus Question

Should humans use animals in psychological research?

Database: *Opposing Viewpoints in Context*

Procedures:

Steps/Activities by the teacher:

- In a class discussion, ask students what they think about animal experimentation.
- Explain that animal experimentation is often used in psychological research. An example of this might be Ivan Pavlov's experiments with dogs.
- Divide the class into two camps: one side should be for psychological experimentation on animals and the other should be against animal experimentation.
- Allow students time to access the *Opposing Viewpoints in Context*. Direct students to the Animal Experimentation topic page. The students should look for articles that support their assigned position on this issue.
- Ask students to find at least three articles that support their positions.
- When students have finished, they should split into their respective camps and try to answer the following prompt: "Agree or disagree: is it necessary and ethical for humans to use animals in psychological research?"
- When each camp has finished their discussions and answered the prompt, each camp should elect a volunteer to present their argument to the class.
- In a class discussion, talk about the advantages and disadvantages of using animals in psychological experiments. Ask students to consider how using animals in experiments has an impact on people.

Steps/Activities by student(s):

- Think about animal experimentation. Do you agree or disagree with using animals in psychological experiments?
- Your teacher will break you into two camps. One side will be for animal experimentation and the other side will be against animal experimentation.
- Access the *Opposing Viewpoints in Context* and select Animal Experimentation from the topic page. Find at least three articles that support your assigned position.

The Animal Experimentation Debate David E. Newton, 2013-05-09 Reviewing the topic from antiquity to the present day this book examines the debate over the use of animals in research in a fair and balanced way The debate over the use of nonhuman animals in experimental research has gone on for centuries and it continues as vigorously today as it ever has In fact in the last decade the controversy has intensified making animal testing a topic at the highest level of debate of any socioscientific issue in the United States This book presents all sides of the issue so that readers can come to their own conclusions as to the morality and validity of animal experimentation and provides biographies of individuals and descriptions of organizations that have been involved in the debate over the centuries Additionally it documents the historical shift in thinking that made animal experimentation commonplace between the time of the ancient Greeks and the 19th century to the mindset of some who argue for an end to the practice and alternative ways of conducting medical experimentation to benefit human health
