 Requirements Engineering Processes and Techniques Why this book was written The value of introducing requirements
 engineering to trainee software engineers is to equip them for the real world of software and systems development What is
 involved in Requirements Engineering As a discipline newly emerging from software engineering there are a range of views
 on where requirements engineering starts and finishes and what it should encompass This book offers the most
 comprehensive coverage of the requirements engineering process to date from initial requirements elicitation through to
 requirements validation How and Which methods and techniques should you use As there is no one catch all technique
 applicable to all types of system requirements engineers need to know about a range of different techniques Tried and tested
 techniques such as data flow and object oriented models are covered as well as some promising new ones They are all based
 on real systems descriptions to demonstrate the applicability of the approach Who should read it Principally written for
 senior undergraduate and graduate students studying computer science software engineering or systems engineering this
 text will also be helpful for those in industry new to requirements engineering Accompanying Website <http://www.comp.lancs.ac.uk/computing/resources/re> Visit our Website <http://www.wiley.com/college/wws> **Software Engineering--ESEC '93** Ian
 Sommerville,Manfred Paul,1993 This volume contains the proceedings of the fourth European Software Engineering
 Conference It contains 6 invited papers and 27 contributed papers selected from more than 135 submissions The volume has
 a mixture of themes Some such as software engineering and computer supported collaborative work are forward looking and
 anticipate future developments others such as systems engineering are more concerned with reports of practical industrial
 applications Some topics such as software reuse reflect the fact that some of the concerns first raised in 1969 when software
 engineering was born remain unsolved problems The contributed papers are organized under the following headings
 requirements specification environments systems engineering distributed software engineering real time systems software
 engineering and computer supported collaborative work software reuse software process and formal aspects of software
