Meaningful Economics Bart J. Wilson, 2024. Economics has a problem: the discipline cannot distinguish the causes of human action from the consequences of human action. Economists deal with matters of fact, not with feelings and morals. They model representations of optimal agents, not flesh and blood human beings in ordinary life. By assuming that incentives and self-interest are sufficient to explain economic activity, economic science proceeds as if the human mind does not matter. But the origins of our actions, ideas, do indeed matter. They make us human. In *Meaningful Economics*, Bart J. Wilson challenges economics to directly engage human beings as we really are, not as economists ideally assume. Wilson argues that economic science is as much about purposes and human values as it is about incentives. Moreover, he shows how the outcomes of our decisions, costs, and benefits, and the origins of our decisions, motives, and goals can be understood in an integrated way. Over the course of the book, Wilson develops a framework that connects the origins of human action to the outcomes of human action, explaining human conduct with causes and effects. He then shows how three basic principles of economics—trade, specialization, and property—require meaning, values, and purpose. With a fresh perspective and a novel theoretical framework that bridges economics and ethics, *Meaningful Economics* explains the roots of human conduct and its economic effects by grounding a science of economics in the moral sentiments that prompt human beings to act.

Mateer, 2017-06. *The Routledge Handbook of Cooperative Economics and Management*. Jerome Nikolai Warren, Lucio Biggiero, Jamin Hübner, Kemi Ogunyemi, 2024-12-23. Cooperatives have spread across virtually all continents. Today the International Cooperative Alliance (ICA) recognises over 3 million cooperatives with 1 billion cooperative members, or about 12% of the human population, and serving many more members of the public collectively owning trillions in assets. This handbook provides a comprehensive introduction to the subject and the current state of affairs with regard to the study of cooperation in the economy generally and of the cooperative and related sectors particularly. It highlights the essential issues and debates, provides a future research agenda, outlining the distinctions and similarities between individual and inter-organisational cooperation, and explores the connections of cooperative economics and management to fundamental ethical principles. This book examines competition and the similarities and differences between competitive economics and cooperative economics, identifying to what extent and how cooperative economics and management are more capable of addressing the problems of global neoliberalism, such as ecological collapse, wealth inequity, value capture, and distribution, including via online platforms and social relational problems. This book offers a variety of new research and theory building.

from various disciplines particularly focusing on the fields of economics and management but extending beyond these disciplines to domains such as sociology psychology anthropology and political science It will become the standard reference work for not only a broad and large audience of scholars researchers and students but also interested professionals policymakers regulators and cooperators in the field wishing to orient themselves in a global rapidly developing movement and field of study with reference to issues of producing and allocating resources and focusing on the impact of cooperation on issues like risk trust the development of preferences institutional governance networks and inequity The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
