## **Process Control Systems Automation:**

Plant-Wide Process Control Kelvin T. Erickson, John L. Hedrick, 1999-04-29 The complete control system engineering solution for continuous and batch manufacturing plants This book presents a complete methodology of control system design for continuous and batch manufacturing in such diverse areas as pulp and paper petrochemical chemical food pharmaceutical and biochemical production Geared to practicing engineers faced with designing increasingly more sophisticated control systems in response to present day economic and regulatory pressures Plantwide Process Control focuses on the engineering portion of a plant automation improvement project It features a full control design information package Control Requirements Definition or CRD and guides readers through all steps of the automation process from the initial concept to design simulation testing implementation and operation This unique and practical resource Integrates continuous batch and discrete control techniques Shows how to use the methodology with any automation project existing or new simple or complex large or small Relates recent ISO and ISA standards to the discipline of control engineering Illustrates the methodology with a pulp and paper mill case study Incorporates numerous other examples from single loop controllers to multivariable controllers

Process Control Engineering Martin Polke, 1994-10-17 This book surveys methods problems and tools used in process control engineering The book is intended both for interested nonspecialists who wish to become acquainted with the discipline of process control engineering and for process control engineers

Practical Batch Process Management Mike Barker, Jawahar Rawtani, 2004-11-18 Historically batch control systems were designed individually to match a specific arrangement of plant equipment They lacked the ability to convert to new products without having to modify the control systems and did not lend themselves to integration with manufacturing management systems Practical Batch Management Systems explains how to utilize the building blocks and arrange the structures of modern batch management systems to produce flexible schemes suitable for automated batch management with the capability to be reconfigured to use the same plant equipment in different combinations It introduces current best practice in the automation of batch processes including the drive for integration with MES Manufacturing Execution System and ERP Enterprise Resource Planning products from major IT vendors References and examples are drawn from DCS PLC batch control products currently on the market Implement modern batch management systems that are flexible and easily reconfigured Integrate batch management with other manufacturing systems including MES and ERP Increase productivity through industry best practice
