Sesan Abiodun Aransiola, Abayomi Bamisaye, Olabisi Peter Abioye, Naga Raju Maddela, 2024-10-03 This volume comprehensively discusses marine bioprospecting and its applications in the marine bioeconomy specifically in clean energy generation and in biomedical industrial and agricultural sectors The advent of modern technology particularly advancements in deep sea exploration and biotechnology has enabled scientists to delve deeper into the ocean s depths and discover a treasure trove of unique organisms and compounds This demonstrates that the rich history of human interactions with the oceans is firmly ingrained in marine bioprospecting The blue economy which is a more accurate name for the systematic search for valuable substances and organisms in the water has gained popularity in recent years as a possible route for sustainable economic development One of the key driving factors behind marine bioprospecting is the growing realization that marine organisms possess unique biochemical compounds with the potential to revolutionize various industries These compounds include novel enzymes antimicrobial agents bioactive molecules and even potential pharmaceuticals Readers will learn about the applications of these discoveries in bioremediation wastewater treatment and biofuel production as well as the identification of natural substitutes for things that are detrimental to the environment which include biodegradable plastics derived from marine microorganisms The primary audience for the book will be governmental and international organizations professionals and economists while the secondary audience will be professors and researchers in the fields of Chemistry Biotechnology Environmental Microbiology and general Ocean Sciences

The State of Food and Agriculture 2020 Food and Agriculture Organization of the United Nations , 2020-11-26

Intensifying water constraints threaten food security and nutrition Thus urgent action is needed to make water use in agriculture more sustainable and equitable Irrigated agriculture remains by far the largest user of freshwater but scarcity of freshwater is a growing problem owing to increasing demand and competition for freshwater resources At the same time rainfed agriculture is facing increasing precipitation variability driven by climate change These trends will exacerbate

disputes among water users and inequality in access to water especially for small scale farmers the rural poor and other vulnerable populations The State of Food and Agriculture 2020 presents new estimates on the pervasiveness of water scarcity in irrigated agriculture and of water shortages in rainfed agriculture as well as on the number of people affected It finds major differences across countries and also substantial spatial variation within countries This evidence informs a discussion of how countries may determine appropriate policies and interventions depending on the nature and magnitude of the problem but also on other factors such as the type of agricultural production system and countries level of development and their political structures Based on this the publication provides guidance on how countries can prioritize policies and interventions to overcome water constraints in agriculture while ensuring efficient sustainable and equitable access to water
