The Research Process Myrtle S. Bolner, Gayle A. Poirier, 2002 Many of the assignments you receive as part of your experience in higher education will require you to use the library for research To do this you must become familiar with its collections and services You may be familiar with your high school or public library You will find however that the college or university library is more complex and often larger than the library with which you may be familiar It probably provides a greater variety of services and it may use a different scheme for classifying its materials Over the last two decades technology has drastically changed the way we think of libraries For many the traditional notion of libraries as storehouses for books has been replaced by the image of a virtual library that is a library in which all the information is available electronically In this image if a building exists at all it is only to house computers and to provide a laboratory in which librarians acting as information specialists are engaged in creating information in digital format Neither the traditional notion of a library as a storehouse for books nor the image of a virtual library is entirely true today However there is a certain amount of validity in each of these images The library you are using probably no longer has a card catalog In most academic libraries the card catalog has been replaced by an online catalog Many libraries have canceled paper subscriptions to indexes and abstracts replacing them with electronic versions Although libraries have gotten rid of their card catalogs in favor of online catalogs and subscribe to online databases and other resources in electronic format they continue to retain and purchase materials in traditional formats paper microfiche microfilm video cassette and the like And while it is true that technology has improved the ways we retrieve information it has also added levels of complexity College and university libraries offer a variety of **Visual Resources Association Bulletin**, 2002 **LASIE**, 2000 Macworld? Automating Media Centers and Small Libraries Dania Bilal Meghabghab, Dania Bilal, 1997. With a practical systematic approach, this guide covers the entire spectrum of activities involved in automating media centers and small libraries. Simple explanations of the principles of automation are combined with field-tested activities that give readers the opportunity for field experience. Comparing various library functions within the automated and unautomated environments, the author describes system selection and implementation in detail, identifies the problems that end users encounter in accessing OPACs, offers innovative solutions to problems to be solved in future OPACs, and recommends activities for hands-on experience. Guidelines for needs assessments and functions analysis, preparation of a Request for Proposal (RFP), barcoding, site preparation, and database maintenance are included. The book also covers the role of the media specialist, different computer systems and their features, LAN topologies and architectures, various components of a USMARC MicroLif Protocol record, OPACs, etc.
