Matematica 5 Elementare:

Mathematicians in Bologna 1861-1960 Salvatore COEN,2012-05-11 The scientific personalities of Luigi Cremona Eugenio Beltrami Salvatore Pincherle Federigo Enriques Beppo Levi Giuseppe Vitali Beniamino Segre and of several other mathematicians who worked in Bologna in the century 1861 1960 are examined by different authors in some cases providing different view points Most contributions in the volume are historical they are reproductions of original documents or studies on an original work and its impact on later research The achievements of other mathematicians are investigated for their present day importance

Peano H. Kennedy,2012-12-06 All students of mathematics know of Peano s postulates for the natural numbers and his famous space filling curve yet their knowledge often stops there Part of the reason is that there has not until now been a full scale study of his life and works This must surely be surprising when one realizes the length of his academic career over 50 years and the extent of his publica tions over 200 in a wide variety of fields many of which had immediate and long term effects on the development of modern mathematics A study of his life seems long overdue It appeared to me that the most likely person to write a biography of Peano would be his devoted disciple Ugo Cassina with whom I studied at the University of Milan in 1957 58 I wrote to Professor Cassina on 29 October 1963 inquiring if he planned to write the biography and I offered him my assistance since I hoped to return to Italy for a year He replied on 28 November 1963 suggesting that we collaborate meaning by this thatI would write the biography in English using his material and advice I gladly agreed to this suggestion but work on the project had hardly begun when Professor Cassina died unexpectedly on 5 October 1964 I then decided to continue the project on my own I spent the academic year 1966 67 in Turin completion of the book took ten years

The International Commission on Mathematical Instruction, 1908-2008: People, Events, and Challenges in Mathematics Education Fulvia Furinghetti,Livia Giacardi,2023-01-30 The book presents the history of ICMI trough a prosopographical approach In other words it pays a lot of attention to the actors of the International movement The portraits of the members of the ICMI Central Committees 1908 1936 and ICMI Executive Committees 1952 2008 and other eminent figures in ICMI history who have passed away in the first 100 years of its life are the guiding thread of the volume Each portrait includes Biographical information An outline of the various contributions made by the individual in question to the study of problems pertaining to mathematics teaching education Primary bibliography Secondary with particular attention to the publications concerning the teaching of mathematics Images photos book frontispieces relevant manuscripts The authors of the portraits 30 altogether are researchers in the history of mathematics mathematics and mathematics education The focus on the officer s role within ICMI and on his her contributions to mathematics education make the portraits different from usual biographies In particular since most officers were active mathematicians the portraits shed light on aspects of their lesser known activity Connecting chapters place the action of these figures in the historical context and in the different phases of ICMI history
