

Medication Administration Competency Assessment

A. Responsibilities & Ethics – Theory

1. Describe whose responsibility it is to check that the medication is prescribed correctly prior to administration.

List what must be checked:

The responsibility belongs to the nurse or midwife and she/he has to check if it is the right medication, medication, dosage, form and time.

2. Which staff member may hold the drug keys?
The nurse has to hold the drug keys.

3. Explain what to do if asked to administer medication:

a. At a dose exceeding BNF recommendation

OR

b. Through route not specified in BNF

In both cases I won't administer the medication.

4. Explain what to do if asked to leave a prepared injection or pot of medication unsupervised

If a problem appears and I have to leave a prepared injection or a pot of medication, I will lock them in a cupboard and take the key with me, or if I'm just asked to leave them for no reason I won't leave them.

5. With regards to Ethics & Law, explain each of the following:

- a. Can a medication be given to a resident who is willing to take it, but lacks the capacity to understand what it is for?

The nurse cannot prescribe the medication, the medic prescribes it and if the medic considers that a certain medication is vital for a resident I will administer that medication.

- b. Can covert medication be given to a person who has the capacity to decide, and who does not wish to take the medication?

I will explain the benefits of taking the medication and if the person is able to decide and he will refuse it, I won't force him to take the medication.

1. Explain where to get up to date information about any medication

You can get information about medication from the prospect, dedicated books, online.

2. Study the list of medication groups below and explain why each might be prescribed and list some common side effects, also give an example of each medication that is in use in the home:

- a. Analgesics
