**Human Development and Interaction in the Age of Ubiquitous Technology** Rahman, Hakikur, 2016-06-27 The human condition is affected by numerous factors in modern society In modern times technology is so integrated into culture that it has become necessary to perform even daily functions Human Development and Interaction in the Age of Ubiquitous Technology is an authoritative reference source for the latest scholarly research on the widespread integration of technological innovations around the globe and examines how human computer interaction affects various aspects of people's lives Featuring emergent research from theoretical perspectives and case studies this book is ideally designed for professionals students practitioners and academicians *World Development Report 2016* World Bank Group, 2016-01-14 Digital technologies are spreading rapidly but digital dividends the broader benefits of faster growth more jobs and better services are not If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone why can't others around the world do the same If 8 million entrepreneurs in China one third of them women can use an e-commerce platform to export goods to 120 countries why can't entrepreneurs elsewhere achieve the same global reach And if India can provide unique digital identification to 1 billion people in five years and thereby reduce corruption by billions of dollars why can't other countries replicate its success Indeed what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver Two main reasons First nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way Second and more important the benefits of digital technologies can be offset by growing risks Startups can disrupt incumbents but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms Employment opportunities may be greater but not when the labor market is polarized The internet can be a platform for universal empowerment but not when it becomes a tool for state control and elite capture The World Development Report 2016 shows that while the digital revolution has forged ahead its analog complements the regulations that promote entry and competition the skills that enable workers to access and then leverage the new economy and the institutions that are accountable to citizens have not kept pace And when these analog complements to digital investments are absent the development impact can be disappointing What then should countries do They should formulate digital development strategies that are much broader than current information and communication technology ICT strategies They should create a policy and institutional environment for technology that fosters the greatest benefits In short they need to build a strong analog foundation to deliver digital dividends to everyone everywhere **World Development Report 2016** World Bank Group, 2016-01-14 This Report aims to inspire and guide the researchers and practitioners who can help advance a new set of development approaches based on a fuller consideration of psychological and social influences p 2 **Emerging Perspectives on the Mobile Content Evolution** Aguado, Juan Miguel, 2015-09-21 In less than a decade mobile technology has revolutionized our cultures societies and economies by

impacting both personal and professional aspects of human life Mobile technology has therefore become the fastest diffusing technology in history expanding and transforming existent possibilities by making technology accessible and ubiquitous Emerging Perspectives on the Mobile Content Evolution seeks a better understanding of the centrality of mobile content in the recent and coming evolution of both the ICT ecosystem and the media industry This publication appeals to a broad audience within the interdisciplinary field of media studies covering topic areas such as journalism marketing and advertising broadcasting information management media management media economics media and technology related public policies media sociology audience consumption studies and arts This publication presents a multi disciplinary discussion through a collection of academic chapters covering topics such as mobile communications and entrepreneurship reflection on wearables and innovation personal and mobile healthcare mobile journalism and innovation and behavioral targeting in the mobile ecosystem
