*Energizing Teacher Education and Professional Development with Problem-Based Learning* Barbara Levin, 2001-04-15  
How can we help both beginning and experienced teachers engage students in today's diverse classrooms? How can we focus on actual problems that teachers face? This book offers a learning tool: problem-based learning (PBL). PBL is an instructional method that encourages learners to use critical thinking and problem solving as they apply content knowledge to real-world problems and issues. Editor Barbara Levin and the book's contributing authors believe that if teachers are to use PBL effectively with their K-12 students, they need to personally experience PBL themselves. Levin provides field-tested examples of how teacher educators have used PBL in many professional development settings. Based on actual PBL units and activities contributed by various authors, the book describes how teachers tackled authentic problems that required them to find, evaluate, and use resources to learn, just as they expect their students to do when using PBL. A brief introduction explains why and how to use PBL with teachers. Chapters 1-5 focus on how the chapter authors used PBL in different teacher preparation courses at several universities. Chapters 6 and 7 show how the authors, working with experienced teachers, used PBL in inservice and staff development settings. The final chapter offers answers to frequently asked questions about using PBL with teachers.

**Handbook of Research on Educational Communications and Technology** J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03  
The 4th edition of the *Handbook of Research on Educational Communications and Technology* expands upon the previous 3 versions, providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition, with most chapters being completely rewritten, expanded, and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review, documenting and explaining the most recent outstanding research, including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross-disciplinary by design, and great effort was taken to invite authors outside of the traditional instructional design and technology community.

**Beyond Standardized Testing** George W.

Elford,2002-10-23 Here s a fresh idea from an experienced testing professional that addresses the problem of the overuse of standardized testing Elford argues that so called test based reform has given rise to the cram curriculum and turned schools into test prep centers Overlooked are the classroom teachers who observe the actual work of students and are the primary and richest source of information on learning The author lays out a better approach to accountability using standards teacher judgments and the tools of the information age This is not an attack on standardized testing which supplies the only interpretable information the public has been able to attain Rather it recommends comprehensive computer based systems that link every teacher and classroom into their school district s data warehouse This system supports and utilizes the richest source of accountability information the presently un tapped knowledge in the minds of teachers At the heart of the system are standardized teacher judgments related to content and performance standards and supported by standards based scoring rubrics that are integrated into a computer based instructional management information system Among the advantages the system offers are Students are graded on quality of their work not how they compare with other students The school or school district becomes the primary source of accountability information instead of the state Provides better information for college admissions Provides employers with a record to use that shows the link between school and work The technology for such a system is ready and waiting This book defines the urgent need for a computer based instructional information system to which every teacher is linked and calls upon innovative school leaders to embrace the idea
