## Commerce Cambridge Papers:

*The Economics of Commerce* Henry de Beltgens Gibbins, 1894      **Commerce and the Commonwealth** Andrew Dilley, 2025-10-07 The history of the Commonwealth of Nations has been subject to limited scholarly enquiry confined to a focus on inter governmental relations and divorced from the lively historiographies on the economics and business of the British Empire Seeking to fill these gaps *Commerce and the Commonwealth* presents a revisionist history of the intertwined political and economic histories of the British Empire and the Commonwealth of Nations From the 1880s a political and economic configuration within the British empire the Empire Commonwealth played a powerful and distinctive role in the business of empire Incoherently conceived the Empire Commonwealth centred on the UK and old dominions neglecting and marginalizing the remainder of the empire This Empire Commonwealth ultimately gave way to and folded into the post colonial Commonwealth of Nations but continued to play important economic roles until the British Empire s collapse after World War II Eschewing state focused approaches *Commerce and the Commonwealth* tracks the history of the Empire Commonwealth and Commonwealth of Nations through its business associations and especially chambers of commerce which organized at imperial and then Commonwealth levels from 1886 to 1975 These associations framed by a distinct Empire Commonwealth political culture sought to shape a wide spectrum of economic policy areas Through these associations the book offers a fresh account of the pan imperial debate on imperial preference and explores other areas of imperial political economy including law currency transport and communications emigration defence and taxation It establishes the layered and subtle existence of tangible economic governance notwithstanding the ever closer disunion of the UK and dominions that lay at the Empire Commonwealth s core The result is a wide ranging and revisionist history of an under studied element of the history of the British Empire that will be important reading for all those interested in modern British history economic history the history of empire and the history of the Commonwealth and its legacies      **A treatise on the principles, practice, and history of commerce [by J.R. McNabb,2016-01-26 A Comparative History of Commerce and Industry Volume II offers a subjective review of how the cultural social and economic institutions of commerce and industry evolved in industrialized nations to produce the institution we now know as business enterprise     **Labor Mobility from Academe to Commerce** Lynne G. Zucker,Michael R. Darby,Maximo Torero,1997 Following a breakthrough discovery scientific knowledge with natural excludability may be best transferred to industry by the labor mobility of top scientists from universities and research institutes to firms We model labor mobility as a function of scientist s quality as measured by scientific citations and his or her reservation wages which is determined by labor quality and the cost of moving and also depends on the trial frequency number of potential firm employers potential interfering offers from universities and experienced increase in productivity of top scientists already in firms reducing reservation values Applying our model to bioscience and related industries we find broad support in a group duration analysis The time a star scientist remains in a university before moving to a firm is significantly decreased as the quality of the bioscientist and as her focus on human genetics increases decreased as the expected frequency of offers increases with increases in local firms commercializing the technology and the percentage of ties to scientists outside the bioscientist s organization decreased by experienced increase in productivity by other star scientists nearby who have already moved to firms Only the number of top quality universities in the local area via interfering university moves increases the time a star scientist remains in a university before moving to a firm We find some evidence of heterogeneity when we decompose the sample of bioscientists by their destination status finding only quality remains significant across both affiliated scientists full time employment in a firm and linked scientists part time employment with all variables that are significant in the duration model also entering for linked scientists
