Skilled Interpersonal Communication Owen Hargie, 2016-10-04. There is a fundamental, powerful and universal desire amongst humans to interact with others. People have a deep seated need to communicate and the greater their ability in this regard the more satisfying and rewarding their lives will be. The contribution of skilled interpersonal communication to success in both personal and professional contexts is now widely recognised and extensively researched. As such knowledge of various types of skills and of their effects in social interaction is crucial for effective interpersonal functioning. The first two chapters introduce the reader to the nature of skilled interpersonal communication and review the main theoretical perspectives. Subsequent chapters provide detailed accounts of the fourteen main skill areas namely nonverbal communication, reinforcement, questioning, reflecting, listening, explaining, self disclosure, set induction, closure, assertiveness, influencing, negotiating and interacting in and leading group discussions. Written by one of the foremost international experts in the field and founded solidly in research, this book provides a key reference for the study of interpersonal communication.
