

## Frictions

When using two knot systems, before reaching the rope should be the active strand & come movement to another. When continuously down & up from the combination of simple ways.

These ways don't have an official name, but we call it "the way that I did it that morning in London".

Frictions rely on the rope's tendency to grip adjacent rope, so practice rope work instead of on land's apparatus to enhance the friction. Friction work that involves one good-for-multiple ropes that tends to be difficult to learn. Using the figure-eight system and different friction and cross change that can be over.

Next, it's included three simple choices. When starting the system, remember that the friction, there:

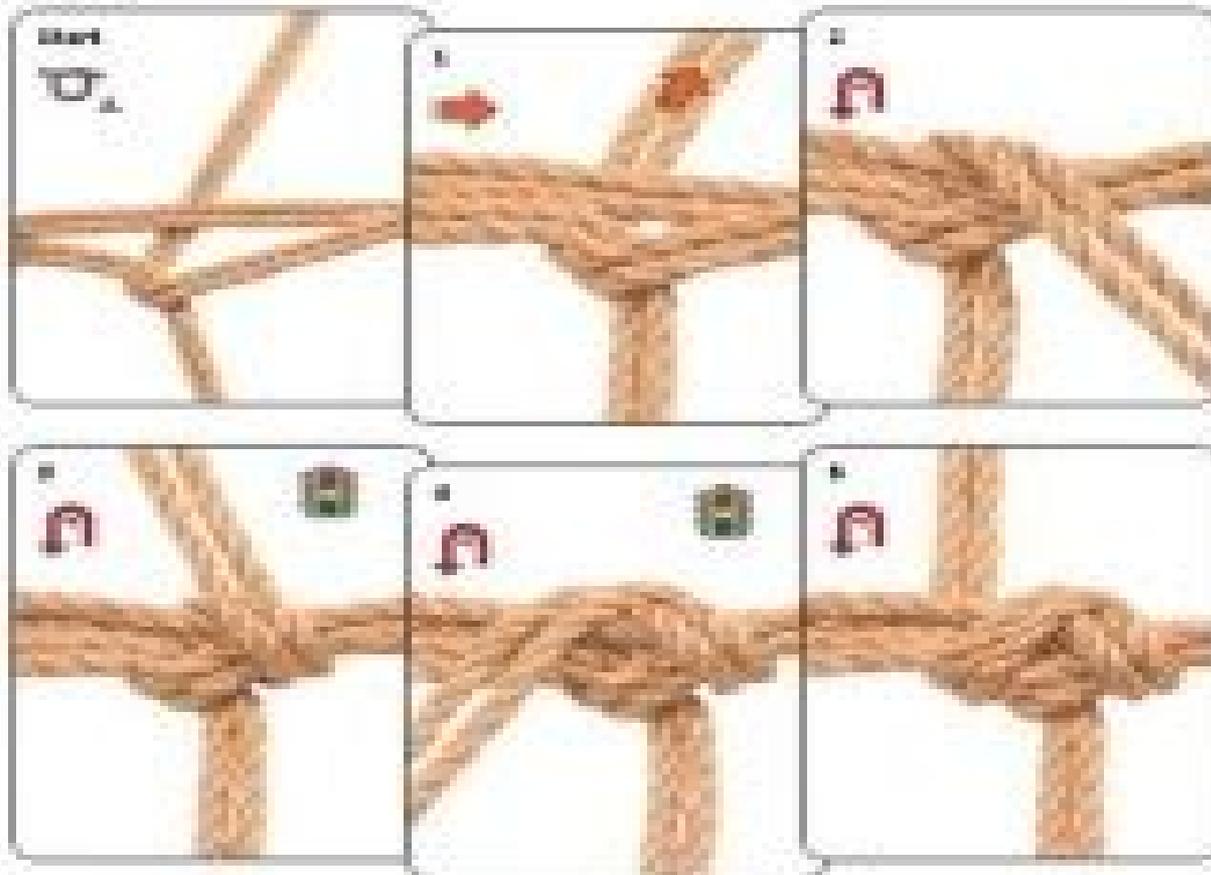

- use appropriate friction adjustment
- you need down at some stage to be simple, depending on the rope
- want to adjust to use the same number of strands combined in the knot

Finally, expect your initial experience to be the very best.

There's a lot of these practical choices to go, so when you begin, make sure you practice with continuously work the rope at any direction you require.

Expect to still be refining your technique over time now.
