The Software Craftsman Sandro Mancuso, 2014-12-12: Be a Better Developer and Deliver Better Code. Despite advanced tools and methodologies, software projects continue to fail. Why? Too many organizations still view software development as just another production line. Too many developers feel that way, too, and they behave accordingly. In The Software Craftsman, Professionalism, Pragmatism, Pride, Sandro Mancuso offers a better and more fulfilling path. If you want to develop software with pride and professionalism, love what you do and do it with excellence, and build a career with autonomy, mastery, and purpose, it starts with the recognition that you are a craftsman. Once you embrace this powerful mindset, you can achieve unprecedented levels of technical excellence and customer satisfaction. Mancuso helped found the world's largest organization of software craftsmen; now he shares what he's learned through inspiring examples and pragmatic advice you can use in your company, your projects, and your career. You will learn why agile processes aren't enough and why craftsmanship is crucial to making them work. How craftsmanship helps you build software right and helps clients in ways that go beyond code. How and when to say No, and how to provide creative alternatives when you do. Why bad code happens to good developers and how to stop creating and justifying it. How to make working with legacy code less painful and more productive. How to be pragmatic, not dogmatic, about your practices and tools. How to lead software craftsmen and attract them to your organization. What to avoid when advertising positions, interviewing candidates, and hiring developers. How developers and their managers can create a true culture of learning. How to drive true technical change and

overcome deep patterns of skepticism Sandro Mancuso has coded for startups software houses product companies international consultancies and investment banks In October 2013 he cofounded Codurance a consultancy based on Software Craftmanship principles and values His involvement with Software Craftmanship began in 2010 when he founded the London Software Craftmanship Community LSCC now the world s largest and most active Software Craftmanship community with more than two thousand craftsmen For the past four years he has inspired and helped developers to organize Software Craftmanship communities throughout Europe the United States and the rest of the world
