Teaching with Tasks for Effective Mathematics Learning Peter Sullivan, Doug Clarke, Barbara Clarke, 2012-09-12 This book is about how teachers can use classroom mathematics tasks to support student learning and presents data on the ways in which teachers used those tasks in a particular research project It is the product of research findings focusing on teacher practice teacher learning and knowledge and student learning It demonstrates how teachers can use mathematics tasks to promote effective student learning PISA A Review of International Large-Scale Assessments in Education Assessing Component Skills and Collecting Contextual Data Cresswell John, Schwantner Ursula, Waters Charlotte, 2015-12-11 The OECD has initiated PISA for Development PISA D in response to the rising need of developing countries to collect data about their education systems and the capacity of their student bodies Confronting Exclusion African Minds, 2013 South Africa has made important political strides over the past two decades It has created a framework of democratic legislative executive and judicial institutions that mark a clear break from the apartheid past In theory they are inclusive and offer every citizen equal access to constitutionally protected rights Their capacity to deliver however is coming under increasing pressure and as this happens citizen confidence in their efficacy is waning Much of the pressure which ultimately may affect their legitimacy in the eyes of ordinary citizens stems from the desperation and sense of economic exclusion experienced by those who find themselves at the wrong end of South Africa's grossly unequal society If this decline in trust persists the cohesive effects of the country's democratic institutions will diminish and instability will become an increasingly common feature of political contestation An immediate but only partial remedy to the current state of affairs would be to prioritise transparency accountability and leadership integrity within the system to restore trust in the bona fides of key institutions The longer term challenge will be to counter a growing sense of economic exclusion where violent police action rather than democratic process is increasingly employed to stave off the manifestations of material anxiety experienced by struggling citizens This edition of the Transformation Audit titled *Confronting Exclusion* focuses on instances of such exclusion but as in previous years also prioritises the search for inclusive economic policy and future strategies to address them By looking at each of the

four chapter areas it seeks to find answers to the challenge of a society in which the promise of true freedom and equal rights will remain only that until people feel equipped to be in charge of their own destiny and that of their children

Psychological Assessment in South Africa Sumaya Laher, Kate Cockcroft, 2013-01-01 This book provides an overview of the research related to psychological assessment across South Africa The thirty six chapters provide a combination of psychometric theory and practical assessment applications in order to combine the currently disparate research that has been conducted locally in this field Existing South African texts on psychological assessment are predominantly academic textbooks that explain psychometric theory and provide brief descriptions of a few testing instruments Psychological Assessment in South Africa provides in depth coverage of a range of areas within the broad field of psychological assessment including research conducted with various psychological instruments The chapters critically interrogate the current Eurocentric and Western cultural hegemonic practices that dominate the field of psychological assessment The book therefore has the potential to function both as an academic text for graduate students as well as a specialist resource for professionals including psychologists psychometrists remedial teachers and human resource practitioners
