and develops recommendations with respect to further fiscal adjustment expenditure prioritization and budget consolidation. The analysis focuses on the following core issues: Sustainability of fiscal adjustment, fiscal transparency, expenditure priorities and short term expenditure management given the existing economy wide institutional constraints. This study covers extra budgetary funds in kind, external grants, subsidies provided by the state owned companies in the energy and utility sectors and operation of the Social Insurance Fund as well as regular budgetary spending. It suggests a medium term action plan to address identified weaknesses. Sector chapters review health, education and social protection and insurance. The report also analyzes budget support for core public infrastructure and Armenia's public investment program.

Treasury Single Account Israel Fainboim Yaker, Sailendra Pattanayak, 2010-06-01. A treasury single account (TSA) is an essential tool for consolidating and managing governments' cash resources, thus minimizing borrowing costs. In countries with fragmented government banking arrangements, the establishment of a TSA should receive priority in the public financial management reform agenda. Drawing on the lessons of the Fund's work in several countries in establishing a TSA, this paper explains its concept, essential features and potential benefits. It also presents alternative models and approaches for designing a TSA that take into account specific country contexts as well as the preconditions and desirable sequencing for its successful implementation. Finally, the paper includes country examples from different regions in support of the analysis and recommendations.
