Charles Nehme, The construction industry particularly the sector involving Mechanical Electrical and Plumbing MEP systems  
stands as one of the most complex and risk laden endeavors in modern development MEP systems are the lifeblood of any  
structure dictating comfort safety efficiency and critically the ultimate cost and schedule of a project Yet these systems are  
disproportionately responsible for project failures leading to frustrating cost overruns devastating technical failures and  
chronic delays that plague owners contractors and consultants alike This book *MEP Project Risk Management Avoiding Cost  
Overruns and Technical Failures* is a direct response to this challenge It is not merely a theoretical discussion it is a  
pragmatic roadmap forged from decades of frontline experience navigating complex international projects Our goal is to  
demystify the unique risks inherent in MEP work from the earliest conceptual design clashes and long lead equipment  
procurement to the final high stakes commissioning and handover We move beyond generic risk management principles to  
provide specific actionable strategies for the MEP professional By adopting the integrated framework presented here project  
teams will be equipped to identify quantify and mitigate threats ensuring that systems are delivered on budget on schedule
