[Psychological Studies in the Teaching, Learning and Assessment of Mathematics](#) Yiming Cao, Zsolt Lavicza, Shuhua An, Lianchun Dong, 2024-05-31 There is no doubt that the onset of a new decade has brought high expectations of academic progress for scholars, especially for researchers in mathematics education. Accordingly, scholars and practitioners frequently emphasize the innovation processes that lead to desired innovative outcomes. Nevertheless, these innovation processes have to be carried out by motivated individuals. Increasingly, academic literature takes the mindsets of these actors into consideration. However, diverging conceptualizations limit our understanding of the term mindset and the role of individuals' mindsets in organizational innovation efforts. This book aims at opening the black box of innovation as a mindset. Linking mindset theories from social psychology to the context of frugal innovation, the author provides rigorous conceptual work on mindsets in innovation. This conceptual research is supported by findings from two empirical studies. This book makes important contributions to theory and practice to academic research by developing conceptual clarity on

understanding innovation as a mindset and providing supportive empirical evidence and to innovation practice by showing how a detailed understanding of individuals mindsets can inform evidence based change interventions
