Cities Change And Conflict Freesm:

Cities, Change, and Conflict Nancy Kleniewski, Alexander R. Thomas, 2019-03-04 *Cities Change and Conflict* was one of the first texts to embrace the perspective of political economy as its main explanatory framework and then complement it with the rich contributions found in the human ecology perspective. Although its primary focus is on North American cities, the book contains several chapters on cities in other parts of the world including Europe and developing nations, providing both historical and contemporary accounts on the impact of globalization on urban development. This edition features new coverage of important recent developments affecting urban life, including the implications of racial conflict in Ferguson, Missouri, and elsewhere; recent presidential urban strategies; the new waves of European refugees; the long-term impacts of the Great Recession as seen through the lens of Detroit's bankruptcy; new and emerging inequalities; and an extended look into Sampson's *Great American City: Beyond*, examining the dynamics that shape the form and functionality of cities. The text surveys the experience of urban life among different social groups, including immigrants, African Americans, women, and members of different social classes. It illuminates the workings of the urban economy, local and federal governments, and the criminal justice system, and also addresses policy debates and decisions that affect almost every aspect of urbanization and urban life.

Urban Change and Citizenship in Times of Crisis Bryan S. Turner, Hannah Wolf, Gregor Fitz, Jürgen Mackert, 2020-04-07 At times of triumphant neo-liberalism, cities increasingly become objects of financial speculation. Formally, social and political rights might not be abolished, yet factually, they have become inaccessible for large parts of the population. The contributions gathered in this volume shed light on the clash between the perspectives of restructuring and reordering urban environments in the interest of investors and the manifold and innovative agencies of resistance that claim and stand up for the rights of urban citizenship. Renewed waves of urban transformation employ state coercion to foster the expulsion of poor and marginalised inhabitants from those urban spaces that attract interest from speculators. The intervention of state agencies triggers the work of hegemonic culture for reframing the housing issue and implementing moral and political legitimation, as well as legislation that restricts urban citizenship rights. The case studies of the volume comparatively show the different and sometimes contradictory patterns of these conflicts in Berlin, Sydney, Belfast, Jerusalem, Amsterdam, and Istanbul, as well as in metropolises of Latin America and China. Innovative resistance agencies emerge that paint possible paths for the re-establishment of the right to the city as the core of urban citizenship.

Urban Environmentalism Peter Charles Brand, Michael J. Thomas, 2005 A critical examination

of urban policies and management practices used to make cities sustainable With an international perspective the book describes urban environmental agendas and how they arose in the context of globalization urban economic restructuring and the need to make cities competitive It argues that the environment became an integral part of city development policy turning attention not only to physical and ecological issues but also to improving the economic performance of cities and the lives of citizens The authors also go beyond the technical issues to explore the political importance of urban environmentalism using case studies to illustrate both its international scope and place specific characteristics which are inexorably influencing city development throughout the world In connecting the concept to its political effects the book raises issues such as local democracy equality and social regulation all of which are increasingly concerning academics professionals environmentalists and city authorities alike Bordered Cities and Divided Societies Scott A.

Bollens,2021-03-18 *Bordered Cities and Divided Societies* is a provocative moving and poetic encounter with the hearts and minds of individuals living in nine cities of conflict violence and healing Jerusalem Belfast Johannesburg Nicosia Sarajevo Mostar Barcelona Bilbao and Beirut Based on research spanning 25 years including 360 interviews and over two and a half years of in country field research this innovative work employs a series of concise reflective narrative essays grouped into four thematic sections to provide a humanistic on the ground understanding of divided cities conflict and peacemaking Incorporating both scholarly analyses based on empirical research and introspective essays Bollens digs underneath grand narratives of conflict to illuminate the complexities and paradoxes of living amid nationalistic political strife and the challenges of planning and policymaking in divided societies Richly illustrated the book includes informative synopses about the cities that provide access for general readers while extensive connections to recent literature enhance the book s research value to scholars *Cities in Transition* Rita Schneider-Sliwa,2006-01-23

This book was written with the aim of showing that even in the era of globalization developments appearing in cities are not subject to almost unconditional global forces Rather universal forces are decisive eventualities in the process of urban restructuring often influencing its course and speed yet developments and particularities within a city strongly influence the course of events and the extent to which negative characteristics of globalization might occur Berlin Brussels Hanoi Ho Chi Minh City Hong Kong Jerusalem Johannesburg Moscow St Petersburg Sarajevo and Vienna Using these important cities the special relationship between global and local regional forces is analyzed The case studies were selected based on their political and cultural context and the fact that their social and political fabric was subject to major changes in the recent past How global processes manifest themselves locally depends to a great extent on how development processes and endogenic potentials are initiated locally in order to cope with the new global economic and societal conditions **Urban Environmentalism** Peter Brand,Michael

globalization urban economic restructuring and the need to make cities competitive It argues that the environment became an integral part of city development policy turning attention not only to physical and ecological issues but also to improving the economic performance of cities and the lives of citizens The authors also go beyond the technical issues to explore the political importance of urban environmentalism using case studies to illustrate both its international scope and place specific characteristics which are inexorably influencing city development throughout the world In connecting the concept to its political effects the book raises issues such as local democracy equality and social regulation all of which are increasingly concerning academics professionals environmentalists and city authorities alike

The Redundant City Norbert Kling,2020-08-15 Norbert Kling explores the rich body of narrative knowledge about conflict and change provided by architecture and urbanism and confronts this knowledge with an empirically grounded situational analysis of a large housing estate His concept of the Redundant City describes a specific form of collectively negotiated urban change

Negotiating Urban Conflicts Helmuth Berking,2006 Cities have always been arenas of social and symbolic conflict As places of encounter between different classes ethnic groups and lifestyles cities play the role of powerful integrators yet on the other hand urban contexts are the ideal setting for marginalization and violence The struggle over control of urban spaces is an ambivalent mode of sociation while producing themselves groups produce exclusive spaces and then in turn use the boundaries they have created to define themselves This volume presents major urban conflicts and analyzes modes of negotiation against the theoretical background of postcolonialism

City Diplomacy Raffaele Marchetti,2021-10-19 How urban diplomacy defines international relations globally

Urban Change and Citizenship in Times of Crisis Bryan S. Turner,Hannah Wolf,Gregor Fitz,Jürgen Mackert,2020-04-07 *Urban Change and Citizenship in Times of Crisis* addresses the fact that in the beginning of the twenty first century the majority of the world s population is urbanised a social fact that has turned cities more than ever into focal sites of social change Multiple economic and political strategies employed by a variety of individual and collective actors on a number of scales constitute cities as contested spaces that hold opportunities as well as restrictions for their inhabitants While cities and urban spaces have long been of central concern for the social sciences today classical sociological questions about the city acquire new meaning Can cities be spaces of emancipation or does life in the modern city entail a corrosion of citizenship rights Is the city the focus of societal transformation processes or do urban environments lose importance in shaping social reality and economic relationships Furthermore new questions urgently need to be asked What is the impact of different historical phenomena such as neo liberal restructuring financial and economic crises or migration flows as well as their respective counter movements on the structure of contemporary cities and on the citizenship rights of city inhabitants The three volumes address such crucial questions thereby opening up new spaces of debate on both the city and new developments of urbanism The contributions to *Theories and Concepts* offer new theoretical reflections on the city in a philosophical and historical perspective as well as fresh empirical analyses of social life in urban

contexts Chapters not only critically revisit classical and modern philosophical considerations about the nature of cities but no less discuss normative philosophical reflections of urban life and the role of religion in historical processes of the emergence of cities Composed around the question whether there can be such a thing as a successful city this volume addresses issues of urban political subjectivities by considering the city's role in historical processes of emancipation the fight for citizenship rights and today's challenges and opportunities with regard to promoting social justice integration and diversity Consequentially theory driven empirical analyses offer new insight into ways of solving problems in urban contexts and a genuine approach to analyse the Social Quality in cities
