### Classroom Observation Essay Essay

The following sample essay on Classroom Observation Essay discusses it in detail, offering basic facts and pros and cons associated with it. To read the essay's introduction, body and conclusion, scroll down.

6th of December 2010 - in the recent classroom observation on the ZC11, a block section for first year Information Technology students taking up Study and Thinking Skills class of Dr. Florece. Evelyn E. Florece, PhD is a faculty of the College of Arts and Sciences under the Literature and Language Studies Department. She was the former IELTS Director of Ateneo and has been teaching English and Language since the high school department paved it way to its new home at Pacol, Naga City. Dr.

Florece's afternoon class was composed of 33 Information Technology (IT) majors from the College of Computer studies, most of them were on their first year at Ateneo de Naga University. The observation starts at exactly 1:15 in the afternoon, covering the student's behavior before class. ZC11 was dismissed earlier by their Theology class teacher. Since they were a blocked section, they waited for their next class in the same room. Student's behavior were the typical like waiting for the teacher outside the classroom, some were chatting with their friends, some were doing their assignments and some were just doing nothing.

#### Classroom Observation Essay Example

Minutes passed and the same student behavior was observed. I overheard some students saying, "sana mayo si ma'am, yaon daw si ma'am?" but another student uttered, "iyo, yaon si ma'am nahiling ko subago" a typical conversation for a student who is waiting for his teacher. But to my analysis, is there something with a teacher that made students say and think as such. I waited for the teacher to arrive and continue observing the student's behavior. Dr. Florece arrived at exactly 1:25 in the afternoon, five minutes before the bell rings.

She enters with confidence and greeted the class with a good afternoon. She placed the white board at the middle of the board and calls for the prayer leader assigned during that day. In every class that she handles, she always assigns a prayer leader who will in turn be the one in-charge of erasing the writings of the board after each class. She is systematic when it comes to prayers, checking of attendance, and in sitting arrangements. She starts the classroom discussion with a reminder about the upcoming preliminary ex

Paper. MET Project** Andrew D. Ho, Thomas J. Kane, 2013 For many teachers the classroom observation has been the only  
opportunity to receive direct feedback from another school professional As such it is an indispensable part of every teacher  
evaluation system Yet it also requires a major time commitment from teachers principals and peer observers To justify the  
investment of time and resources a classroom observation should be both accurate and reliable In this paper the authors  
evaluate the accuracy and reliability of school personnel in performing classroom observations The authors also examine  
different combinations of observers and lessons observed that produce reliability of 0.65 or above when using school  
personnel They asked principals and peers in Hillsborough County Florida to watch and score videos of classroom teaching  
for 67 teacher volunteers using videos of lessons captured during the 2011-12 school year Each of 129 observers provided 24  
scores on lessons provided to them yielding more than 3 000 video scores for this analysis The authors briefly summarize  
seven key findings 1 Observers rarely used the top or bottom categories unsatisfactory and advanced on the four point  
observation instrument 2 Compared to peer raters administrators differentiated more among teachers 3 Administrators rated  
their own teachers 0.1 points higher than administrators from other schools and 0.2 points higher than peers 4 Although  
administrators scored their own teachers higher their rankings were similar to the rankings produced by others outside their  
schools 5 Allowing teachers to choose their own videos generated higher average scores However the relative ranking of  
teachers was preserved whether videos were chosen or not 6 When an observer formed a positive or negative impression of a  
teacher in the first several videos that impression tended to linger and 7 There are a number of different ways to ensure  
reliability of 0.65 or above The authors conclude by discussing the implications for the design of teacher evaluation systems  
in practice Contains 7 figures 10 tables and 21 footnotes *Technology-Assisted Learning: Honing Students' Affective
