Changing Geographies of Fashion in the European

Semi-Periphery Monika Murzyn-Kupisz, 2026-01-01 Sustainability in fashion production and consumption is considered a major contemporary challenge and at the same time a visible trend in the fashion market Despite a growing body of academic literature on the topic detailed analyses have so far mainly pertained to only a selected dimension of the fashion market design production retail or consumption They have more often explored major fashion centres brands and firms rather than independent designers SMEs or independent fashion events and other alternative consumption means and spaces or less obvious intermediaries in the fashion market Although the issue of sustainable fashion has been noticed in the academic discourse in Poland it is yet to be examined bringing together the production and consumption side of the issue Nor has the spatial dimension of fashion market transformation in Poland been analysed in detail Taking a geographic perspective this book fills this research gap by presenting a holistic approach to the fashion market including design production and consumption of fashion considering the social cultural and spatial dimensions of the matter and diverse stakeholders who participate in it Providing a comprehensive analysis of long term changes in the Polish fashion market the book addresses several interesting issues These include the extent to which the sustainable reorientation of the fashion market accompanies the broader processes of adaptation restructuring and upgrading of the textile and clothing sector how it fits into the broader logic of culturalisation of clothing production and commercialisation of design as an applied artistic genre and a part of the

creative sector and to what extent it is connected with new alternative consumption patterns with respect to channels places and spaces of clothing purchases and re use The main premise of the book is that although it is still a relatively small part of the fashion market in Poland sustainable fashion design production and consumption is an increasingly important phenomenon with significant social economic and spatial implications The book therefore argues that sustainable design and production constitute a promising opportunity for adaptation restructuring and upgrading of the textile and clothing sector in the European semi periphery Using the metaphor of the fashion ecosystem it also illustrates how sustainable fashion practices contribute to the creation of new links and networks within the fashion industry alongside a more fragmented domestic production structure Chapter 1 and 9 are licensed under the terms of the Creative Commons Attribution 4 0 International License a href <http://creativecommons.org/licenses/by/4.0/> a For further details see license information in the chapters [Eco-Innovation and Sustainable Development in Industry 5.0](#) Atiku, Sulaiman Olusegun,Jeremiah, Andrew,Semente, Efigenia,Boateng, Frank,2024-06-05 In the era of Industry 5 0 the world faces a critical juncture where technological advancement collides with escalating socio environmental challenges Climate change energy consumption and threats to public health are exacerbated by the rapid embrace of Industry 4 0 technologies As businesses pursue efficiency the compromise on human and social sustainability becomes inevitable The need for a holistic approach to sustainable development is urgent where economic growth aligns seamlessly with environmental social and human well being Eco Innovation and Sustainable Development in Industry 5 0 serves as a guide in the pursuit of sustainable development within Industry 5 0 This book dissects the intricate challenges posed by socio environmental issues and seamlessly offers a multidisciplinary approach to achieving sustainable development goals The detrimental impact of Industry 4 0 on sustainable development necessitates the paradigm shift proposed within the book Economic pursuits can no longer overshadow the crucial pillars of human social and environmental sustainability The delicate balance required for a sustainable future is at risk demanding a multidisciplinary approach to reconcile these seemingly conflicting objectives This book is a call to action to bridge the knowledge gap and provide tangible solutions for achieving sustainability in Industry 5 0
