architectural models and 20 mechanisms this indispensable guide provides a comprehensive education of cloud computing essentials that will never leave your side *Gamification of the Internal Innovation Process* Julius Schöning,2015-09-14 Bachelor Thesis from the year 2014 in the subject Business economics Offline Marketing and Online Marketing grade 1 3 Technical University of Munich TUM School of Management language English abstract Gamification has been hyped during the last years There are studies predicting an enormous rise of the rate of companies gamifying their innovation process Nevertheless the majority of those projects are supposed to fail because the application might be designed poorly In this thesis a comprehensive examination of theoretical background is delivered the providers of gamification software are ascertained case studies of some of their completed projects are analyzed and interviews are conducted with implementing consultants The thesis concludes that gamifying an innovation platform for time restricted innovation challenges can be a very powerful and successful management tool if implemented properly Open ended gamification approaches of innovation platforms usually fail to meet its business objectives in the long run because participation decreases over time *Core Concepts of Accounting Information Systems* Mark G. Simkin,James L. Worrell,Arline A. Savage,2018-05-14 Accounting Information systems AIS have become indispensable in the field and this book provides clear guidance for students or professionals needing to get up to speed Designed to suit a one semester AIS course at the graduate undergraduate or community college level Core Concepts of Accounting Information Systems explores AIS use and processes in the context of modern day accounting Coverage includes conceptual overviews of data analytics accounting and risk management as well as detailed discussion of business processes cybercrime database design and more to provide a well rounded introduction to AIS Case studies reinforce fundamental concepts using real world scenarios that encourage critical thinking while AIS at Work examples illustrate complex procedures or concepts in everyday workplace situations Test Yourself questions allow students to gauge their level of understanding while End of Chapter questions stimulate application of new skills through problems cases and discussion questions that facilitate classroom dialogue Practical current relevant and grounded in everyday application this book is an invaluable resource for students of managerial accounting tax accounting and compliance *The Impact of Advanced Automation and the Cloud on Employment* Aidan Mc Carron,2018-08-13 Master s Thesis from the year 2015 in the subject Computer Science Commercial Information Technology grade 2 1 Trinity College Dublin The University of Dublin language English abstract One of the primary fears in the current global community is the exponential growth and continued sophistication of artificial intelligence Fundamental to this concern is the wide ranging impact that this growth will not only leave on the world as we currently know it but on the place of humans in that world This has become termed as the singularity the point in time when machines will become self learning and more importantly self aware It is at this point that machines and robotics will be elevated from the current monotonous job operations to more high skilled areas This study looks into the drive towards advanced automation and the increased sophistication of artificial intelligence in conjunction

with the cloud and how this growth will eventually lead to technological unemployment Some economists are predicting up to a 50% job loss or more Predicting the future typically means extrapolating the past It often fails to anticipate breakthroughs But it is precisely those unpredictable breakthroughs in computing that could have the biggest impact on the workforce Education and up skilling current workers will be the only way to ensure continued relevance within an automated workforce By focusing on education it will ensure people are best placed to take advantage of this new age of advanced automation This dissertation concludes that innovation through creativity will ensure employment opportunities continue to present themselves to those best prepared for such changes
