Define or describe each concept below:

Concept	Description
Concentration of ligand	Initial conditions or effect of the perturbation
Operational Efficacy	Max potential response (intrinsic activity)
Receptor	Max response of system (total capacity)
Emax	Ratio of the maximum response to the maximum

### Pharmacology

- How does drug-receptor binding determine subsequent response? How do you estimate the contribution of each receptor? How do you estimate the effect of the perturbation? These questions are related to the effect of the perturbation. Add some receptor characteristics identified in some systematic studies with an effect on the response.
- How do you determine the effect of each receptor? How do you determine the effect of each receptor? How do you determine the effect of each receptor?
- Estimate the number of each receptor molecule you need to make to make the perturbation with an effect on the response. How do you estimate the number of each receptor molecule?
- Estimate how many different molecules you need to make to make the response. How do you estimate the number of each receptor molecule?
