Citrix Presentation Server allows remote users to work off a network server as if they weren't remote That means Incredibly fast access to data and applications for users no third party VPN connection and no latency issues All of these features make Citrix Presentation Server a great tool for increasing access and productivity for remote users Unfortunately these same features make Citrix just as dangerous to the network it's running on By definition Citrix is granting remote users direct access to corporate servers achieving this type of access is also the holy grail for malicious hackers To compromise a server running Citrix Presentation Server a hacker need not penetrate a heavily defended corporate or government server They can simply compromise the far more vulnerable laptop remote office or home office of any computer connected to that server by Citrix Presentation Server All of this makes Citrix Presentation Server a high value target for malicious hackers And although it is a high value target Citrix Presentation Servers and remote workstations are often relatively easily hacked because they are often times deployed by overworked system administrators who haven't even configured the most basic security features offered by Citrix The problem in other words isn't a lack of options for securing Citrix instances the problem is that administrators aren't using them eWeek October 2007 In support of this assertion Security researcher Petko D Petkov aka pdp said in an Oct 4 posting that his recent testing of Citrix gateways led him to tons of wide open Citrix instances including 10 on government domains and four on military domains The most comprehensive book published for system administrators providing step by step instructions for a secure Citrix Presentation Server Special chapter by Security researcher Petko D Petkov aka pdp detailing tactics used by malicious hackers to compromise Citrix Presentation Servers Companion Web site contains custom Citrix scripts for administrators to install configure and troubleshoot Citrix Presentation Server [Citrix XenDesktop 7 Cookbook](#) Gaspare A. *Mastering XenApp®* Sunny Jha, 2015-12-11 Master the skills required to implement Citrix XenApp 7.6 to deploy a complete Citrix hosted application from scratch About This Book Learn to

implement and configure components of Citrix XenApp 7.6 which are XenServer, XenApp, Citrix License server, PVS, Storefront, Citrix Receiver, and Netscaler to secure WAN traffic. Build the XenApp 7.6 environment independently and perform tests to make sure the components are working as expected for internal and external traffic. Implement advanced tools in Citrix XenApp to build and manage a cost-effective, secure, and high-performing application delivery infrastructure with this comprehensive guide.

**Who This Book Is For** This book is for administrators who are currently managing the implemented environment and want to learn how to deploy the Citrix Hosted virtualization solution for the application in a Windows Server 2012 R2 environment. A reasonable knowledge and understanding of core XenApp elements and concepts used during virtualizing applications are assumed.

**What You Will Learn** Understand how to set up Hypervisor, install the management console, configure the storage repository, and create a virtual machine on hypervisor. Set up an Infrastructure component and explore ways to tune them up so that they can be used for Citrix environment. Set up a Domain controller, DHCP, Certificate authority, and SQL server for static database for Citrix XenApp. Validate the Citrix XenApp 7.6 solution to make sure components are communicating properly. Manage the essential Citrix components: Director, Licensing, and Policies with the Help of Citrix Studio. Optimize the behavior of an Application and share desktop via Policies. Installing and configuring Citrix Provisioning services to deliver Citrix XenApp 7.6 virtual machines. Secure the external Delivery of an application and shared desktop via Netscaler to enjoy mobility.

**In Detail** Citrix XenApp is one of the leading pieces of Application delivery software that delivers Windows-compatible apps to users on any device anywhere. Citrix XenApp also gives administrators the ability to manage and control the freedom of mobility by increasing the security and saving costs at the same time. This book will provide you with all the knowledge required to successfully deploy and master a complete Citrix-hosted application. First, it will cover essential concepts of the architecture of XenApp. You will then learn how to set up Hypervisor and how to set up Infrastructure components. Next, you will learn how to Set up Citrix Components: XenApp, resources, PVS, and Netscaler. We will further look at how to prepare the environment for Rollout. Additionally, you will learn how to configure the Citrix components such as Citrix Director. Moreover, you will learn about shared desktop for delivery to end users and the application of policies for effective and secure delivery. Finally, you will learn how to implement provisioning services for a Citrix XenApp 7.6 environment.

**Style and approach** This book is based on a course outline and hence takes a very practical approach so you will understand how to implement the components of XenApp in a production environment. Complemented with many best practices and troubleshooting concepts of XenApp, this book will help you master XenApp swiftly.
