

Cooling Theory Lectures Notes

Markus Hupfer and members of the team!

September 7, 2024

These are the notes for the 2024 Summer Term of Cooling Theory. These are peer-reviewed and give insights on problems for all of the cooling game. Some are the proceedings with results on the lecture, the other contributions to Cooling Theory and the book of Hoffman and Peter Pridemore's at the University of Illinois. I also used several other sources for additional material. Some are in Part II course book of Cambridge on Cooling Theory and Engineering given by Professor John Kestin, and the other course notes from a Cambridge book on Subsonic Compressible Flow given by Professor Ian Glasser. I also included some from David Coker's 1982 course, Applied Maths for the Phys. Department. The last source of the notes is based on Hugh Brinkley course notes, "Graph Based Cooling".

All credits go to those who did my best.

Contents

I	Introduction	00
1.1	The basic physics of Cooling Theory	00
1.2	History of Cooling	00
